Dear XX:

As the Trump Presidential records continue to be transferred into our physical custody, it has come to our attention that certain records cannot be accounted for. We therefore need your assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that near the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after he became President, it is considered a Presidential record – all of the other Presidential Libraries maintain the original copy of that letter, and it is necessary that it be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were maintained by the President in his residence over the course of his last year in office and have not been transferred to NARA, despite a determination by Pat Cipollini in the final days of the Administration that they need to be.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the physical transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records that may still be in the physical custody of President Trump.

Please let us know how we can resolve these issues.

Thanks,

Dear XX:

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with Scott to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

We are now also aware that certain paper/textual records cannot be accounted for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after he became President, it is considered a Presidential record – all of the other Presidential Libraries maintain the original copy of similar letters, and it is necessary that it be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by Pat Cipollone in the final days of the Administration that they need to be.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records that may still be in the physical custody of President Trump.

Please let us know how we can resolve these issues.

Cc: (b) (6), (b) (7)(C) <(b) (6), (b) (7)(C)@nara.gov>

fyi, (b) (6), (b) (7)(C) and I have had several conversations with (b) (6), (b) (7)(C) since the end of the Trump Administration about various paper records that he believes were not transferred to us ((b) (6), (b) (7)(C) has also raised some of these concerns directly with David). Attached is the text of an email I am planning to send to the Trump PRA reps ((b) (6), (b) (7)(C)) seeking their assistance in accounting and transferring them to us.

Please review and let us know if you have any questions or comments or would like to discuss further.

Also, we are still working through various problems with social media records, and at some point will need to raise them also with the Trump reps.

Thanks,
Gary

Subject: Need for Assistance re Presidential Records

(b) (6), (b) (7)(C)

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems

15bRR-001169

that we need your help in resolving. We have already been working with (b) (6), (b) (7) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,

Gary

(b) (6), (b) (7)(C)

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with (b) (6), (b) (7)(C) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7)(C) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,

Gary

(b) (6), (b) (7)(C) will coordinate with you on arranging for transfer of the North Korea records.

Please let me know as soon as you can the status of the other records that we have raised. It is vitally important that we account for them, and any other Presidential records that may still be outside of our possession, as quickly as possible.

Thanks,
Gary

Subject: Need for Assistance re Presidential Records

(b) (6), (b) (7)(C)

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with (b) (6), (b) (7)(C) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7)(C) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,

Gary

As you have seen in the press, the House has requested records. Our ability to respond requires access to the 24 boxes which have yet to be accounted for. At this point, I am assuming that they have been destroyed. In which case, I am obligated to report it to the Hill, DOJ, and the White House.

As you have seen in the press, the House has requested records. Our ability to respond requires access to the 24 boxes which have yet to be accounted for. At this point, I am assuming that they have been destroyed. In which case, I am obligated to report it to the Hill, DOJ, and the White House.

Subject: Need for Assistance re Presidential Records

(b) (6), (b) (7)(C)

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with (b) (6), (b) (7)(C) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7)(C) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,

Gary

Subject: Draft Letter to AG re Missing Trump Records
Attachments: AG Letter re Missing Trump Records.docx Problems with Trump Presidential Records on Social Media Platforms.docx

Attached is a draft letter that we could consider sending to the Attorney General about missing Trump records. It focuses only on the paper records that we believe to be missing (subject to confirmation that they were not unknowingly sent to us). Also, I have now informally reached out to DOJ counsel about this issue.

Also attached is the list of issues that we discovered with respect to social media records, essentially the result of the Trump WH's failure to capture them through the use of third-party archiving tools. I do not think that these problems are something that the AG/DOJ can deal with, but it could be appropriate to report them to Congress -- especially since the January 6 Committee has specifically requested Trump's Tweets from the day of January 6, and our official collection does not include any possible deleted tweets (although it is possible that there were no such tweets from that day).

As I have already noted, Trump's Rep (b) (6), (b) (7)(C) has asked that I discuss this with him later this week. In addition, WH Counsel is now also aware of the issue, and has asked that I keep them in the loop to the extent that we make any reference to the White House Office of Records Management.

I am happy to discuss further how best to address these issues.

Thanks,
Gary

DRAFT: Attorney Client/Attorney Work Product

The Honorable Merrick Garland
Attorney General
U.S. Department of Justice
Washington, DC

Dear General Garland:

I write pursuant to my authority as Archivist of the United States to seek your assistance for the recovery of Presidential records that may have been unlawfully removed from U.S. Government custody or possibly destroyed in violation of the Presidential Records Act (PRA), 44 U.S.C. Chapter 22.

The PRA establishes that “[t]he United States shall reserve and retain complete ownership, possession, and control of Presidential records; and such records shall be administered in accordance with the provisions of this chapter.” 44 U.S.C. § 2202. The PRA further establishes that, “[u]pon the conclusion of a President’s term of office . . . , the Archivist of the United States shall assume responsibility for the custody, control, and preservation of, and access to, the Presidential records of that President.” *Id.* § 2203(g)(1).

The PRA has no explicit provision on how I should address concerns about suspected removal or destruction of Presidential records. I am, therefore, exercising my discretion to follow the process established for me under the Federal Records Act (FRA), which authorizes me to “request the Attorney General to initiate” an action “for the recovery of records unlawfully removed and for other redress provided by law.” 44 U.S.C. § 2905(a). The same provision states that I “shall notify the Congress when such a request has been made.”

When President Trump left office on January 20, 2021, the National Archives and Records Administration (NARA) assumed full legal custody of all Trump Administration Presidential records. However, given the volume and complexity of the records, the vast majority of which exist in a multitude of electronic formats, and the controversy concerning the election results, it has taken through the summer of 2021 to complete the physical transfer of virtually all of the records from the White House complex and White House data centers to NARA’s archival facilities and cloud-hosted data center. In the course of this process, we have become aware that a small number of Trump Presidential paper records were not transferred to NARA, as follows:

- Approximately 24 boxes of paper records that were maintained by President Trump in the White House Residence. During the final days of the Trump Administration, the Chief of Staff and the Counsel to the President had determined that these boxes needed to be transferred to the White House Office of Records Management so that they could be transferred to NARA, but such transfer never took place. We requested that the Office of President Trump search for these records, and have been informed that they could not be located.

DRAFT: Attorney Client/Attorney Work Product

- The original letter that President Obama left for President Trump on his first day in office. Since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA’s other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well. We requested that the Office of President Trump search for this record, and to date it has not been located.
- The original poster board of the path of Hurricane Dorian that President Trump marked up with a sharpie. It was recalled from the White House Office of Records Management prior to the end of the Administration, but was never returned for transfer to NARA. We requested that the Office of President Trump search for this record, and to date it has not been located.

Accordingly, I am hereby requesting your assistance in recovering these missing Presidential records, along with any other original Presidential records from the Trump Administration that may subsequently be identified and located.

Please note that the original correspondence between President Trump and North Korean Leader Kim Jong-un was also missing. However, in response to our request to search for these records, the Office of President Trump has found them in Mara Lago, FL and will be returning them to NARA.

My General Counsel will follow up with your staff to determine the best way to address this issue.

Sincerely,

Problems with Trump Presidential Records on Social Media Platforms

- Deleted Tweets from @realDonaldTrump Twitter account. In March 2017, NARA advised the Trump White House that it should capture and preserve all tweets that the President posts in the course of his official duties, including those that are subsequently deleted, as Presidential records, and NARA was informed by White House officials that they were, in fact, doing so. Since the end of the administration, we learned that the White House stopped using an automated tool to capture deleted Tweets in April 2020, and Twitter was unable to provide them to us after the fact. Accordingly, we were unable to obtain a complete set of these Presidential records from the White House. We are considering utilizing what was collected by non-governmental sources as an adjunct to our archival collection.
 - In addition, no steps were taken to capture deleted content from any Trump Administration social media records other than @realDonaldTrump until the Administration procured a third party social media archiving tool in February 2018. After that, use of the tool was widespread but not timely. For example, most accounts were eventually enrolled but may have been active for weeks, months, or years prior to enrollment, during which time deleted content was not captured.
- The third party tool used to capture social media content from Twitter, Instagram, and Facebook included the ability to capture direct messages on the platforms. The Administration opted to not enable capture of direct messages, but was unable to report whether direct messaging was used on any of the platforms by the account holders.
- SnapChat was used by the Trump Administration (realdonaldtrump and whitehouse), which advised they were capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump administration used the White House account approximately five times during four years. However, the realdonaldtrump account was used regularly. News reports indicate the account had 1.5 million followers on the platform. It is not known whether direct messaging was enabled on the account.
- NARA identified seven Twitter accounts which we believe contain PRA records but were not captured by the Trump Administration. NARA obtained the publicly available tweets at the end of the administration through a third party to supplement its archival collection. These include accounts from Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro.
- The Trump Administration advised NARA that two social media accounts it believed should be treated as containing PRA content were not enrolled in their third party archiving tool and could not be retroactively enrolled. These accounts were Donald J.

Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook to obtain access to the accounts but was never able to do so.

Attached is a draft letter that we could consider sending to the Attorney General about missing Trump records. It focuses only on the paper records that we believe to be missing (subject to confirmation that they were not unknowingly sent to us). Also, I have now informally reached out to DOJ counsel about this issue.

Also attached is the list of issues that we discovered with respect to social media records, essentially the result of the Trump WH's failure to capture them through the use of third-party archiving tools. I do not think that these problems are something that the AG/DOJ can deal with, but it could be appropriate to report them to Congress -- especially since the January 6 Committee has specifically requested Trump's Tweets from the day of January 6, and our official collection does not include any possible deleted tweets (although it is possible that there were no such tweets from that day).

As I have already noted, Trump's Rep ^{(b) (6), (b) (7)(C)} has asked that I discuss this with him later this week. In addition, WH Counsel is now also aware of the issue, and has asked that I keep them in the loop to the extent that we make any reference to the White House Office of Records Management.

I am happy to discuss further how best to address these issues.

Thanks,
Gary

Subject: Re: Trump boxes

Late yesterday I spoke with (b) (6), (b) (7)(C) the Trump PRA Rep, who had caught up with (b) (6), (b) (7)(C). He asked where the number 24 boxes came from, because he said that (b) (6), (b) (7) said that they had found 12 boxes in Florida, which consisted entirely of news clippings, which they considered non-record, and that they were not aware of any other boxes, and that, under no circumstances, has anything been destroyed. I explained that our information came from the WH Office of Records Management, which was based on their experience and efforts throughout the administration to keep track of all records that were "seen by the President."

In order to try to clear up the confusion and disconnect over this issue, he proposed that we have a meeting/call next week with (b) (6), (b) (7) David, him, me, and (b) (6), (b) (7)(C) if possible. We both understood that we would have to coordinate with WH Counsel concerning any involvement by (b) (6), (b) (7). Accordingly, I then spoke with Jonathan Su, Deputy Counsel to the President, to let him know about (b) (6), (b) (7) proposal. Jonathan proposed that he, (b) (6), (b) (7) and I have a meeting/call early next week to figure out the best way to work through this issue and ascertain the facts. I expect we will have that call on Tuesday or Wednesday, after which we can figure out next steps.

(b) (6) was also completely unaware of the issues we have with Twitter and other social media records. Those issues were mostly handled by (b) (6), (b) (7)(C) another WH lawyer and now Trump Rep, until the last days of the administration. I gave (b) (6) a brief update of what we know so far.

Let me know if you have any questions or would like to discuss further.

Thanks,
Gary

Subject: Re: Document shared with you: "AG Letter re Missing Trump Records.docx"
To: (b) (6), (b) (7)(C) <(b) (6), (b) (7)(C)@nara.gov>, (b) (6), (b) (7)(C) <(b) (6), (b) (7)(C)@nara.gov>, (b) (6), (b) (7)(C) <(b) (6), (b) (7)(C)@nara.gov>, (b) (6), (b) (7)(C) <(b) (6), (b) (7)(C)@nara.gov>

fyi, I shared the following with David, Deb, and Jay today:

Late yesterday I spoke with (b) (6), (b) (7)(C) the Trump PRA Rep, who had caught up with (b) (6), (b) (7)(C). He asked where the number 24 boxes came from, because he said that (b) (6), (b) (7)(C) said that they had found 12 boxes in Florida, which consisted entirely of news clippings, which they considered non-record, and that they were not aware of any other boxes, and that, under no circumstances, has anything been destroyed. I explained that our information came from the WH Office of Records Management, which was based on their experience and efforts throughout the administration to keep track of all records that were "seen by the President."

In order to try to clear up the confusion and disconnect over this issue, he proposed that we have a meeting/call next week with (b) (6), (b) (7)(C) David, him, me, and (b) (6), (b) (7)(C) if possible. We both understood that we would have to coordinate with WH Counsel concerning any involvement by (b) (6), (b) (7)(C). Accordingly, I then spoke with Jonathan Su, Deputy Counsel to the President, to let him know about (b) (6), (b) (7)(C) proposal. Jonathan proposed that he, (b) (6), (b) (7)(C) and I have a meeting/call early next week to figure out the best way to work through this issue and ascertain the facts. I expect we will have that call on Tuesday or Wednesday, after which we can figure out next steps.

(b) (6), (b) (7)(C) was also completely unaware of the issues we have with Twitter and other social media records. Those issues were mostly handled by (b) (6), (b) (7)(C) another WH lawyer and now Trump Rep, until the last days of the administration. I gave (b) (6), (b) (7)(C) a brief update of what we know so far.

Let me know if you have any questions or would like to discuss further.

(b) (6), (b) (7)(C), (b) (5)

Also, here's additional background on the social media issues we discussed. On page 2 of the [Archivist's March 30, 2017, response to queries from Senators McCaskill and Carper](#), he stated that "NARA has advised the White House that it should capture and preserve all tweets that the President posts in the course of his official duties, including those that are subsequently deleted, as Presidential records, and NARA has been informed by White House officials that they are, in fact, doing so." (b) (5)

- No steps were taken to capture deleted content from any Trump Administration social media records other than @realDonaldTrump until the Administration procured a third party social media archiving tool in February 2018. After that, use of the tool was widespread but not timely. For example, most accounts were eventually enrolled but may have been active for weeks, months, or years prior to enrollment, during which time deleted content was not captured.
- At the end of the administration, NARA learned that the White House stopped using the social media archiving tool to capture deleted Tweets in April 2020, and Twitter was unable to provide the deleted Tweets to us after the fact. Accordingly, NARA was unable to obtain a complete set of these Presidential records from the White House. NARA is considering utilizing what was collected by non-governmental sources as an adjunct to our archival collection.
- The third party tool used to capture social media content from Twitter, Instagram, and Facebook included the ability to capture direct messages on the platforms. The Administration opted not to enable capture of direct messages, but was unable to report whether direct messaging was used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we believe contain PRA records but were not captured by the Trump Administration. NARA obtained the publicly available tweets at the end of the administration through a third party to supplement its archival collection. These include accounts from Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro.

- In its last weeks, the Trump Administration advised NARA that two social media accounts it believed should be treated as containing PRA content were not enrolled in their third party archiving tool and could not be retroactively enrolled. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook to obtain access to the accounts but was never able to do so.
- SnapChat was used by the Trump Administration (realdonaldtrump and whitehouse), and NARA was advised that they were capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump administration used the White House account approximately five times during four years. However, the realdonaldtrump account was used regularly. News reports indicate the account had 1.5 million followers on the platform. It is not known whether direct messaging was enabled on the account.

Subject: Need for Assistance re Presidential Records

(b) (6), (b) (7)(C)

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with (b) (6), (b) (7)(C) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some

problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7)(C) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,

Gary

To: (b) (6), (b) (7)(C) <(b) (6), (b) (7)(C)@nara.gov>, (b) (6), (b) (7)(C) <(b) (6), (b) (7)(C)@nara.gov>, (b) (6), (b) (7)(C) <(b) (6), (b) (7)(C)@nara.gov>, (b) (6), (b) (7)(C) <(b) (6), (b) (7)(C)@nara.gov>

fyi, I shared the following with David, Deb, and Jay today:

Late yesterday I spoke with (b) (6), (b) (7)(C) the Trump PRA Rep, who had caught up with (b) (6), (b) (7)(C). He asked where the number 24 boxes came from, because he said that (b) (6), (b) (7)(C) said that they had found 12 boxes in Florida, which consisted entirely of news clippings, which they considered non-record, and that they were not aware of any other boxes, and that, under no circumstances, has anything been destroyed. I explained that our information came from the WH Office of Records Management, which was based on their experience and efforts throughout the administration to keep track of all records that were "seen by the President."

In order to try to clear up the confusion and disconnect over this issue, he proposed that we have a meeting/call next week with (b) (6), (b) (7)(C) David, him, me, and (b) (6), (b) (7)(C) if possible. We both understood that we would have to coordinate with WH Counsel concerning any involvement by (b) (6), (b) (7)(C). Accordingly, I then spoke with Jonathan Su, Deputy Counsel to the President, to let him know about (b) (6), (b) (7)(C) proposal. Jonathan proposed that he, (b) (6), (b) (7)(C) and I have a meeting/call early next week to figure out the best way to work through this issue and ascertain the facts. I expect we will have that call on Tuesday or Wednesday, after which we can figure out next steps.

(b) (6), (b) (7)(C) was also completely unaware of the issues we have with Twitter and other social media records. Those issues were mostly handled by (b) (6), (b) (7)(C) another WH lawyer and now Trump Rep, until the last days of the administration. I gave (b) (6), (b) (7)(C) a brief update of what we know so far.

Let me know if you have any questions or would like to discuss further.

Jay:

I think we have completed the search to the best of our ability. I have listed 33 NSC boxes at the end of this email out of an abundance of caution because they are tagged as POTUS. I think it is very unlikely that these are relevant to our search. But let me know if you want me to ask Bill and David to search these boxes.

(b) (6), (b) (7)(C)

1. NARA only picked up boxes from the following:
 - a. ORM, NSC, WHCA (video tapes), OA (backup tapes), WHMO (flags), and OPC (Correspondence - delivered by RDS)
 - b. Only ORM and NSC would have the type of records for which we are looking.
 - c. ORM is 99.9% sure they did not pick up the boxes in question. We have put eyes on all boxes from ORM that were coded as too late to file. Nothing seems relevant
 - d. NSC did not pick up any boxes from the Residence and the records that they picked up from the West Wing did not seem out of the ordinary.

2. Searches of the following terms on the outside of the ORM and NSC boxes identify no relevant hits.
 - a. Residence
 - b. Third
 - c. 3rd
 - d. Floor
 - e. Second
 - f. 2nd
 - g. Donald Trump
 - h. POTUS (with the exception of NSC files below)
 - i. Oval Office
 - j. Dorian
 - k. Parade
 - l. Personal
 - m. Mar-a-lago
 - n. Maralago
 - o. Florida
 - p. Military
 - q. Tower
 - r. Bedminster
 - s. NYC
 - t. New York

Late yesterday I spoke with (b) (6), (b) (7)(C) the Trump PRA Rep, who had caught up with (b) (6), (b) (7)(C). He asked where the number 24 boxes came from, because he said that (b) (6), (b) (7)(C) said that they had found 12 boxes in Florida, which consisted entirely of news clippings, which they considered non-record, and that they were not aware of any other boxes, and that, under no circumstances, has anything been destroyed. I explained that our information came from the WH Office of Records Management, which was based on their experience and efforts throughout the administration to keep track of all records that were "seen by the President."

In order to try to clear up the confusion and disconnect over this issue, he proposed that we have a meeting/call next week with (b) (6), (b) (7)(C) David, him, me, and (b) (6), (b) (7)(C) if possible. We both understood that we would have to coordinate with WH Counsel concerning any involvement by (b) (6), (b) (7)(C). Accordingly, I then spoke with Jonathan Su, Deputy Counsel to the President, to let him know about (b) (6), (b) (7)(C) proposal. Jonathan proposed that he, (b) (6), (b) (7)(C) and I have a meeting/call early next week to figure out the best way to work through this issue and ascertain the facts. I expect we will have that call on Tuesday or Wednesday, after which we can figure out next steps.

(b) (6), (b) (7)(C) was also completely unaware of the issues we have with Twitter and other social media records. Those issues were mostly handled by (b) (6), (b) (7)(C) another WH lawyer and now Trump Rep, until the last days of the administration. I gave (b) (6), (b) (7)(C) a brief update of what we know so far.

Let me know if you have any questions or would like to discuss further.

Thanks,
Gary

Jay:

I think we have completed the search to the best of our ability. I have listed 33 NSC boxes at the end of this email out of an abundance of caution because they are tagged as POTUS. I think it is very unlikely that these are relevant to our search. But let me know if you want me to ask Bill and David to search these boxes.

(b) (6), (b) (7)(C)

1. NARA only picked up boxes from the following:
 - a. ORM, NSC, WHCA (video tapes), OA (backup tapes), WHMO (flags), and OPC (Correspondence

- delivered by RDS)
- b. Only ORM and NSC would have the type of records for which we are looking.
- c. ORM is 99.9% sure they did not pick up the boxes in question. We have put eyes on all boxes from ORM that were coded as too late to file. Nothing seems relevant
- d. NSC did not pick up any boxes from the Residence and the records that they picked up from the West Wing did not seem out of the ordinary.

2. Searches of the following terms on the outside of the ORM and NSC boxes identify no relevant hits.

- a. Residence
- b. Third
- c. 3rd
- d. Floor
- e. Second
- f. 2nd
- g. Donald Trump
- h. POTUS (with the exception of NSC files below)
- i. Oval Office
- j. Dorian
- k. Parade
- l. Personal
- m. Mar-a-lago
- n. Maralago
- o. Florida
- p. Military
- q. Tower
- r. Bedminster
- s. NYC
- t. New York

Correct, we cannot go to DOJ while we are engaged in ongoing discussions with the White House and the Trump reps, which could help to clarify, if not actually resolve, the issue.

We can address the social media issues on a separate track, which we should do in parallel with two related actions: 1) responding to the 1/6 Committees requests for Trump's 1/6 tweets; and 2) our plans to post in early October the Trump social media PRA records that we did receive from the WH.

Jay:

I think we have completed the search to the best of our ability. I have listed 33 NSC boxes at the end of this email out of an abundance of caution because they are tagged as POTUS. I think it is very unlikely that these are relevant to our search. But let me know if you want me to ask Bill and David to search these boxes.

(b) (6), (b) (7)(C)

1. NARA only picked up boxes from the following:
 - a. ORM, NSC, WHCA (video tapes), OA (backup tapes), WHMO (flags), and OPC (Correspondence - delivered by RDS)
 - b. Only ORM and NSC would have the type of records for which we are looking.
 - c. ORM is 99.9% sure they did not pick up the boxes in question. We have put eyes on all boxes from ORM that were coded as too late to file. Nothing seems relevant
 - d. NSC did not pick up any boxes from the Residence and the records that they picked up from the West Wing did not seem out of the ordinary.

2. Searches of the following terms on the outside of the ORM and NSC boxes identify no relevant hits.
 - a. Residence
 - b. Third
 - c. 3rd
 - d. Floor
 - e. Second
 - f. 2nd

Correct, we cannot go to DOJ while we are engaged in ongoing discussions with the White House and the Trump reps, which could help to clarify, if not actually resolve, the issue.

We can address the social media issues on a separate track, which we should do in parallel with two related actions: 1) responding to the 1/6 Committees requests for Trump's 1/6 tweets; and 2) our plans to post in early October the Trump social media PRA records that we did receive from the WH.

Thanks,
Gary

On Sat, Sep 4, 2021, 12:31 PM GaryM Stern <garym.stern@nara.gov> wrote:

Late yesterday I spoke with (b) (6), (b) (7)(C) the Trump PRA Rep, who had caught up with (b) (6), (b) (7)(C). He asked where the number 24 boxes came from, because he said that (b) (6), (b) (7) said that they had found 12 boxes in Florida, which consisted entirely of news clippings, which they considered non-record, and that they were not aware of any other boxes, and that, under no circumstances, has anything been destroyed. I explained that our information came from the WH Office of Records Management, which was based on their experience and efforts throughout the administration to keep track of all records that were "seen by the President."

In order to try to clear up the confusion and disconnect over this issue, he proposed that we have a meeting/call next week with (b) (6), (b) (7) David, him, me, and (b) (6), (b) (7)(C) if possible. We both understood that we would have to coordinate with WH Counsel concerning any involvement by (b) (6), (b) (7). Accordingly, I then spoke with Jonathan Su, Deputy Counsel to the President, to let him know about (b) (6), (b) (7) proposal. Jonathan proposed that he, (b) (6), (b) (7) and I have a meeting/call early next week to figure out the best way to work through this issue and ascertain the facts. I expect we will have that call on Tuesday or Wednesday, after which we can figure out next steps.

(b) (6), (b) (7) was also completely unaware of the issues we have with Twitter and other social media records. Those issues were mostly handled by (b) (6), (b) (7)(C) another WH lawyer and now Trump Rep, until the last days of the administration. I gave (b) (6), (b) (7) a brief update of what we know so far.

Let me know if you have any questions or would like to discuss further.

Thanks,
Gary

On Sat, Sep 4, 2021, 12:31 PM GaryM Stern <garym.stern@nara.gov> wrote:

Late yesterday I spoke with (b) (6), (b) (7)(C) the Trump PRA Rep, who had caught up with (b) (6), (b) (7)(C). He asked where the number 24 boxes came from, because he said that (b) (6), (b) (7) said that they had found 12 boxes in Florida, which consisted entirely of news clippings, which they considered non-record, and that they were not aware of any other

boxes, and that, under no circumstances, has anything been destroyed. I explained that our information came from the WH Office of Records Management, which was based on their experience and efforts throughout the administration to keep track of all records that were "seen by the President."

In order to try to clear up the confusion and disconnect over this issue, he proposed that we have a meeting/call next week with (b) (6), (b) (7) David, him, me, and (b) (6), (b) (7)(C) if possible. We both understood that we would have to coordinate with WH Counsel concerning any involvement by (b) (6), (b) (7)(C). Accordingly, I then spoke with Jonathan Su, Deputy Counsel to the President, to let him know about (b) (6), (b) (7)(C) proposal. Jonathan proposed that he, (b) (6), (b) (7)(C) and I have a meeting/call early next week to figure out the best way to work through this issue and ascertain the facts. I expect we will have that call on Tuesday or Wednesday, after which we can figure out next steps.

(b) (6), (b) (7)(C) was also completely unaware of the issues we have with Twitter and other social media records. Those issues were mostly handled by (b) (6), (b) (7)(C) another WH lawyer and now Trump Rep, until the last days of the administration. I gave (b) (6), (b) (7)(C) a brief update of what we know so far.

Let me know if you have any questions or would like to discuss further.

Thanks,

Gary

Jay:

I think we have completed the search to the best of our ability. I have listed 33 NSC boxes at the end of this email out of an abundance of caution because they are tagged as POTUS. I think it is very unlikely that these are relevant to our search. But let me know if you want me to ask Bill and David to search these boxes.

(b) (6), (b) (7)(C)

1. NARA only picked up boxes from the following:
 - a. ORM, NSC, WHCA (video tapes), OA (backup tapes), WHMO (flags), and OPC (Correspondence - delivered by RDS)
 - b. Only ORM and NSC would have the type of records for which we are looking.
 - c. ORM is 99.9% sure they did not pick up the boxes in question. We have put eyes on all boxes from ORM that were coded as too late to file. Nothing seems relevant
 - d. NSC did not pick up any boxes from the Residence and the records that they picked up from the West Wing did not seem out of the ordinary.

2. Searches of the following terms on the outside of the ORM and NSC boxes identify no relevant hits.
 - a. Residence
 - b. Third
 - c. 3rd
 - d. Floor
 - e. Second
 - f. 2nd
 - g. Donald Trump
 - h. POTUS (with the exception of NSC files below)
 - i. Oval Office
 - j. Dorian
 - k. Parade
 - l. Personal
 - m. Mar-a-lago
 - n. Maralago
 - o. Florida
 - p. Military
 - q. Tower
 - r. Bedminster
 - s. NYC
 - t. New York

I think we have completed the search to the best of our ability. I have listed 33 NSC boxes at the end of this email out of an abundance of caution because they are tagged as POTUS. I think it is very unlikely that these are relevant to our search. But let me know if you want me to ask Bill and David to search these boxes.

(b) (6), (b) (7)(C)

1. NARA only picked up boxes from the following:
 - a. ORM, NSC, WHCA (video tapes), OA (backup tapes), WHMO (flags), and OPC (Correspondence - delivered by RDS)
 - b. Only ORM and NSC would have the type of records for which we are looking.
 - c. ORM is 99.9% sure they did not pick up the boxes in question. We have put eyes on all boxes from ORM that were coded as too late to file. Nothing seems relevant
 - d. NSC did not pick up any boxes from the Residence and the records that they picked up from the West Wing did not seem out of the ordinary.
2. Searches of the following terms on the outside of the ORM and NSC boxes identify no relevant hits.
 - a. Residence
 - b. Third
 - c. 3rd
 - d. Floor
 - e. Second
 - f. 2nd
 - g. Donald Trump
 - h. POTUS (with the exception of NSC files below)

On Sat, Sep 4, 2021, 12:31 PM GaryM Stern <garym.stern@nara.gov> wrote:
Late yesterday I spoke with (b) (6), (b) (7)(C) the Trump PRA Rep, who had caught up with (b) (6), (b) (7)(C) He asked where the number 24 boxes came from, because he said that (b) (6), (b) (7) said that they had found 12 boxes in Florida, which consisted entirely of news clippings, which they considered non-record, and that they were not aware of any other boxes, and that, under no circumstances, has anything been destroyed. I explained that our information came from the WH Office of Records Management, which was based on their experience and efforts throughout the administration to keep track of all records that were "seen by the President."

In order to try to clear up the confusion and disconnect over this issue, he proposed that we have a meeting/call next week with (b) (6), (b) (7) David, him, me, and (b) (6), (b) (7)(C) if possible. We both understood that we would have to coordinate with WH Counsel concerning any involvement by (b) (6), (b) (7). Accordingly, I then spoke with Jonathan Su, Deputy Counsel to the President, to let him know about (b) (6), (b) (7) proposal. Jonathan proposed that he, (b) (6), (b) (7) and I have a meeting/call early next week to figure out the best way to work through this issue and ascertain the facts. I expect we will have that call on Tuesday or Wednesday, after which we can figure out next steps.

(b) (6) was also completely unaware of the issues we have with Twitter and other social media records. Those issues were mostly handled by (b) (6), (b) (7)(C) another WH lawyer and now Trump Rep, until the last days of the administration. I gave (b) (6), (b) (7) a brief update of what we know so far.

Let me know if you have any questions or would like to discuss further.

Thanks,
Gary

Jay:

I think we have completed the search to the best of our ability. I have listed 33 NSC boxes at the end of this email out of an abundance of caution because they are tagged as POTUS. I think it is very unlikely that these are relevant to our search. But let me know if you want me to ask Bill and David to search these boxes.

(b) (6), (b) (7)(C)

1. NARA only picked up boxes from the following:
 - a. ORM, NSC, WHCA (video tapes), OA (backup tapes), WHMO (flags), and OPC (Correspondence - delivered by RDS)
 - b. Only ORM and NSC would have the type of records for which we are looking.
 - c. ORM is 99.9% sure they did not pick up the boxes in question. We have put eyes on all boxes from ORM that were coded as too late to file. Nothing seems relevant
 - d. NSC did not pick up any boxes from the Residence and the records that they picked up from the West Wing did not seem out of the ordinary.

2. Searches of the following terms on the outside of the ORM and NSC boxes identify no relevant hits.
 - a. Residence
 - b. Third
 - c. 3rd
 - d. Floor
 - e. Second
 - f. 2nd
 - g. Donald Trump
 - h. POTUS (with the exception of NSC files below)
 - i. Oval Office
 - j. Dorian
 - k. Parade
 - l. Personal
 - m. Mar-a-lago
 - n. Maralago
 - o. Florida
 - p. Military
 - q. Tower
 - r. Bedminster
 - s. NYC
 - t. New York

Correct, we cannot go to DOJ while we are engaged in ongoing discussions with the White House and the Trump reps, which could help to clarify, if not actually resolve, the issue.

We can address the social media issues on a separate track, which we should do in parallel with two related actions: 1) responding to the 1/6 Committees requests for Trump's 1/6 tweets; and 2) our plans to post in early October the Trump social media PRA records that we did receive from the WH.

I think we have completed the search to the best of our ability. I have listed 33 NSC boxes at the end of this email out of an abundance of caution because they are tagged as POTUS. I think it is very unlikely that these are relevant to our search. But let me know if you want me to ask Bill and David to search these boxes.

1. NARA only picked up boxes from the following:
 - a. ORM, NSC, WHCA (video tapes), OA (backup tapes), WHMO (flags), and OPC (Correspondence - delivered by RDS)
 - b. Only ORM and NSC would have the type of records for which we are looking.
 - c. ORM is 99.9% sure they did not pick up the boxes in question. We have put eyes on all boxes from ORM that were coded as too late to file. Nothing seems relevant
 - d. NSC did not pick up any boxes from the Residence and the records that they picked up from the West Wing did not seem out of the ordinary.

2. Searches of the following terms on the outside of the ORM and NSC boxes identify no relevant hits.
 - a. Residence
 - b. Third
 - c. 3rd
 - d. Floor
 - e. Second
 - f. 2nd
 - g. Donald Trump
 - h. POTUS (with the exception of NSC files below)
 - i. Oval Office

On Sat, Sep 4, 2021, 12:31 PM GaryM Stern <garym.stern@nara.gov> wrote:

Late yesterday I spoke with [REDACTED] the Trump PRA Rep, who had caught up with [REDACTED] He asked where the number 24 boxes came from, because he said that [REDACTED] said that they had found 12 boxes in Florida, which consisted entirely of news clippings, which they considered non-record, and that they were not

aware of any other boxes, and that, under no circumstances, has anything been destroyed. I explained that our information came from the WH Office of Records Management, which was based on their experience and efforts throughout the administration to keep track of all records that were "seen by the President."

In order to try to clear up the confusion and disconnect over this issue, he proposed that we have a meeting/call next week with (b) (6), (b) (7)(F), David, him, me, and (b) (6), (b) (7)(C) if possible. We both understood that we would have to coordinate with WH Counsel concerning any involvement by (b) (6), (b) (7)(F). Accordingly, I then spoke with Jonathan Su, Deputy Counsel to the President, to let him know about (b) (6), (b) (7)(F) proposal. Jonathan proposed that he, (b) (6), (b) (7)(F) and I have a meeting/call early next week to figure out the best way to work through this issue and ascertain the facts. I expect we will have that call on Tuesday or Wednesday, after which we can figure out next steps.

(b) (6), (b) (7)(C) was also completely unaware of the issues we have with Twitter and other social media records. Those issues were mostly handled by (b) (6), (b) (7)(C) another WH lawyer and now Trump Rep, until the last days of the administration. I gave (b) (6), (b) (7)(C) a brief update of what we know so far.

Let me know if you have any questions or would like to discuss further.

Thanks,
Gary

Jay:

I think we have completed the search to the best of our ability. I have listed 33 NSC boxes at the end of this email out of an abundance of caution because they are tagged as POTUS. I think it is very unlikely that these are relevant to our search. But let me know if you want me to ask Bill and David to search these boxes.

(b) (6), (b) (7)(C)

1. NARA only picked up boxes from the following:
 - a. ORM, NSC, WHCA (video tapes), OA (backup tapes), WHMO (flags), and OPC (Correspondence - delivered by RDS)
 - b. Only ORM and NSC would have the type of records for which we are looking.
 - c. ORM is 99.9% sure they did not pick up the boxes in question. We have put eyes on all boxes from ORM that were coded as too late to file. Nothing seems relevant
 - d. NSC did not pick up any boxes from the Residence and the records that they picked up from the West Wing did not seem out of the ordinary.

2. Searches of the following terms on the outside of the ORM and NSC boxes identify no relevant hits.
 - a. Residence
 - b. Third
 - c. 3rd
 - d. Floor
 - e. Second
 - f. 2nd
 - g. Donald Trump
 - h. POTUS (with the exception of NSC files below)
 - i. Oval Office
 - j. Dorian
 - k. Parade
 - l. Personal
 - m. Mar-a-lago
 - n. Maralago
 - o. Florida
 - p. Military
 - q. Tower
 - r. Bedminster
 - s. NYC

t. New York

In order to try to clear up the confusion and disconnect over this issue, he proposed that we have a meeting/call next week with (b) (6), (b) (7)(C), David, him, me, and (b) (6), (b) (7)(C) if possible. We both understood that we would have to coordinate with WH Counsel concerning any involvement by (b) (6), (b) (7)(C). Accordingly, I then spoke with Jonathan Su, Deputy Counsel to the President, to let him know about (b) (6), (b) (7)(C) proposal. Jonathan proposed that he, (b) (6), and I have a meeting/call early next week to figure out the best way to work through this issue and ascertain the facts. I expect we will have that call on Tuesday or Wednesday, after which we can figure out next steps.

(b) (6), (b) (7)(C) was also completely unaware of the issues we have with Twitter and other social media records. Those issues were mostly handled by (b) (6), (b) (7)(C) another WH lawyer and now Trump Rep, until the last days of the administration. I gave (b) (6), (b) (7)(C) a brief update of what we know so far.

Let me know if you have any questions or would like to discuss further.

Thanks,
Gary

Jay:

I think we have completed the search to the best of our ability. I have listed 33 NSC boxes at the end of this email out of an abundance of caution because they are tagged as POTUS. I think it is very unlikely that these are relevant to our search. But let me know if you want me to ask Bill and David to search these boxes.

(b) (6), (b) (7)(C)

1. NARA only picked up boxes from the following:
 - a. ORM, NSC, WHCA (video tapes), OA (backup tapes), WHMO (flags), and OPC (Correspondence - delivered by RDS)
 - b. Only ORM and NSC would have the type of records for which we are looking.
 - c. ORM is 99.9% sure they did not pick up the boxes in question. We have put eyes on all boxes from ORM that were coded as too late to file. Nothing seems relevant
 - d. NSC did not pick up any boxes from the Residence and the records that they picked up from the West Wing did not seem out of the ordinary.

2. Searches of the following terms on the outside of the ORM and NSC boxes identify no relevant hits.
 - a. Residence
 - b. Third
 - c. 3rd
 - d. Floor
 - e. Second
 - f. 2nd
 - g. Donald Trump
 - h. POTUS (with the exception of NSC files below)
 - i. Oval Office
 - j. Dorian
 - k. Parade
 - l. Personal
 - m. Mar-a-lago
 - n. Maralago
 - o. Florida
 - p. Military
 - q. Tower
 - r. Bedminster
 - s. NYC

t. New York

(b) (5), (b) (6), (b) (7)(C)

NARA did not receive, all of the Presidential records created by President Trump and White House staff that were posted on social media platforms, as summarized in more detail below:

- Early in the Trump Administration, questions were raised about President Trump's use of his personal Twitter account to conduct official government business and whether deleted tweets were being captured and preserved as Presidential records. In March 2017, NARA advised the Trump Administration that it should capture and preserve as Presidential records all tweets that the President posts in the course of his official duties, whether on his personal @realDonaldTrump account or on the official @POTUS account, including those tweets that were subsequently deleted. As I reported in a March 30, 2017, letter to Senators Claire McCaskill and Tom Carper, NARA was "informed by White House officials that they [were], in fact, doing so."

Since the end of the administration, we have learned that the White House initially used a manual process to capture tweets that were deleted from @realDonaldTrump and @POTUS by copying them from non-governmental organizations that were capturing them, such as Propublica and Factba.se. The White House did not begin using the vendor ArchiveSocial to automate the capture of tweets and other social media records in real-time until January 2018. Moreover, @realDonaldTrump was not enrolled until August 2018 and the tool stopped capturing @realDonaldTrump in April 2020. The official @POTUS was enrolled in February 2018 and remained connected throughout the rest of the administration.

When properly implemented, ArchiveSocial captures all versions of content as it appears on the platforms, along with any changes, such as deleted or edited content, changes to an account profile, and direct or private messages. However, it cannot capture such changes retroactively. If a social media account is not enrolled or subsequently becomes disconnected from ArchiveSocial, any changes, including deleted or modified posts, cannot be captured.

The Twitter account @realDonaldTrump was disconnected from ArchiveSocial in April 2020. A key feature of ArchiveSocial is that it sends automated alerts to the account owners/system administrators every three to five days to remind them to reconnect any disconnected accounts. The tool also displays information about the account status in the dashboard. It appears that Trump Administration officials failed to respond to these frequent and repeated alerts and never re-enrolled that account.

When White House officials brought this problem to our attention near the end of the administration, Twitter had permanently suspended @realDonaldTrump. NARA contacted Twitter directly to ask if it retained the account data between April 20th and the account's suspension. Twitter provided us with a copy of the available account data. However, it did not include previously deleted tweets, which are not retained by the company. Accordingly, we were unable to obtain a complete set of these Presidential records from the Trump Administration or Twitter. While we do have access to copies of deleted tweets collected by other non-governmental sources, we do not consider them as official Presidential records and cannot ensure the completeness of their captured account data.

- The Trump White House did not take any steps to capture deleted content from any Trump Administration social media account other than @realDonaldTrump or @POTUS prior to enrolling them with ArchiveSocial. As with @realDonaldTrump, many other Trump Administration social media accounts were not enrolled until the summer or fall of 2018, even though these accounts were active for over a year prior to enrollment, during which time deleted or modified Presidential record content was not captured. Other accounts were not enrolled until just prior to the end of the administration.

- The ArchiveSocial tool included the ability to capture direct messages that may have been used on the platforms, but the Trump Administration opted not to enable capture of direct messages, and was unable to report whether direct messaging was actually used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we think contain presidential record information, but were not captured by the Trump Administration. These accounts belonged to Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro. After the end of the administration, NARA obtained the publicly available tweets from these accounts in order to supplement its archival collection.
- In January 2021, administration officials advised NARA that two social media accounts they thought contained Presidential record content were not enrolled in ArchiveSocial and could not be retroactively enrolled as they had been suspended by the platforms. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook, which operates Instagram, to obtain access to the accounts, but Facebook was not able to provide access.
- SnapChat was used by the Trump Administration, (@realDonaldTrump and @whitehouse), which advised NARA that it was capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump Administration used the @whitehouse account approximately five times during four years. However, the administration regularly used the @realDonaldTrump account. News reports indicate that the account had 1.5 million followers on the platform. We do not know whether direct messaging was enabled on the account. We are not able to determine to what extent @realDonaldTrump SnapChat contained unique Presidential records as compared to content duplicative from other platforms, or purely campaign related material which would not have been a Presidential record.

Please let me know when you would like to discuss further.

Thanks,
Gary

Also, here's additional background on the social media issues we discussed. On page 2 of the [Archivist's March 30, 2017, response to queries from Senators McCaskill and Carper](#), he stated that "NARA has advised the White House that it should capture and preserve all tweets that the President posts in the course of his official duties, including those that are subsequently deleted, as Presidential records, and NARA has been informed by White House officials that they are, in fact, doing so." (b) (5)

[Redacted]

- No steps were taken to capture deleted content from any Trump Administration social media records other than @realDonaldTrump until the Administration procured a third party social media archiving tool in February 2018. After that, use of the tool was widespread but not timely. For example, most accounts were eventually enrolled but may have been active for weeks, months, or years prior to enrollment, during which time deleted content was not captured.
- At the end of the administration, NARA learned that the White House stopped using the social media archiving tool to capture deleted Tweets in April 2020, and Twitter was unable to provide the deleted Tweets to us after the fact. Accordingly, NARA was unable to obtain a complete set of these Presidential records from the White House. NARA is considering utilizing what was collected by non-governmental sources as an adjunct to our archival collection.
- The third party tool used to capture social media content from Twitter, Instagram, and Facebook included the ability to capture direct messages on the platforms. The Administration opted not to enable capture of direct messages, but was unable to report whether direct messaging was used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we believe contain PRA records but were not captured by the Trump Administration. NARA obtained the publicly available tweets at the end of the administration through a third party to supplement its archival collection. These include accounts from Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro.
- In its last weeks, the Trump Administration advised NARA that two social media accounts it believed should be treated as containing PRA content were not enrolled in their third party archiving tool and could not be retroactively enrolled. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook to obtain access to the accounts but was never able to do so.
- SnapChat was used by the Trump Administration (realdonaldtrump and whitehouse), and NARA was advised that they were capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump administration used the White House account approximately five times during four years. However, the realdonaldtrump account was used regularly. News reports indicate the account had 1.5 million followers on the platform. It is not known whether direct messaging was enabled on the account.

Subject: Need for Assistance re Presidential Records

^{(b) (6), (b) (7)(C)}:

As the EOP continues to transfer the electronic Trump

Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with (b) (6), (b) (7) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,
Gary

NARA did not receive, all of the Presidential records created by President Trump and White House staff that were posted on social media platforms, as summarized in more detail below:

- Early in the Trump Administration, questions were raised about President Trump's use of his personal Twitter account to conduct official government business and whether deleted tweets were being captured and preserved as Presidential records. In March 2017, NARA advised the Trump Administration that it should capture and preserve as Presidential records all tweets that the President posts in the course of his official duties, whether on his personal @realDonaldTrump account or on the official @POTUS account, including those tweets that were subsequently deleted. As I reported in a March 30, 2017, letter to Senators Claire McCaskill and Tom Carper, NARA was "informed by White House officials that they [were], in fact, doing so."

Since the end of the administration, we have learned that the White House initially used a manual process to capture tweets that were deleted from @realDonaldTrump and @POTUS by copying them from non-governmental organizations that were capturing them, such as Propublica and Factba.se. The White House did not begin using the vendor ArchiveSocial to automate the capture of tweets and other social media records in real-time until January 2018. Moreover, @realDonaldTrump was not enrolled until August 2018 and the tool stopped capturing @realDonaldTrump in April 2020. The official @POTUS was enrolled in February 2018 and remained connected throughout the rest of the administration.

When properly implemented, ArchiveSocial captures all versions of content as it appears on the platforms, along with any changes, such as deleted or edited content, changes to an account profile, and direct or private messages. However, it cannot capture such changes retroactively. If a social

media account is not enrolled or subsequently becomes disconnected from ArchiveSocial, any changes, including deleted or modified posts, cannot be captured.

The Twitter account @realDonaldTrump was disconnected from ArchiveSocial in April 2020. A key feature of ArchiveSocial is that it sends automated alerts to the account owners/system administrators every three to five days to remind them to reconnect any disconnected accounts. The tool also displays information about the account status in the dashboard. It appears that Trump Administration officials failed to respond to these frequent and repeated alerts and never re-enrolled that account.

When White House officials brought this problem to our attention near the end of the administration, Twitter had permanently suspended @realDonaldTrump. NARA contacted Twitter directly to ask if it retained the account data between April 20th and the account's suspension. Twitter provided us with a copy of the available account data. However, it did not include previously deleted tweets, which are not retained by the company. Accordingly, we were unable to obtain a complete set of these Presidential records from the Trump Administration or Twitter. While we do have access to copies of deleted tweets collected by other non-governmental sources, we do not consider them as official Presidential records and cannot ensure the completeness of their captured account data.

- The Trump White House did not take any steps to capture deleted content from any Trump Administration social media account other than @realDonaldTrump or @POTUS prior to enrolling them with ArchiveSocial. As with @realDonaldTrump, many other Trump Administration social media accounts were not enrolled until the summer or fall of 2018, even though these accounts were active for over a year prior to enrollment, during which time deleted or modified Presidential record content was not captured. Other accounts were not enrolled until just prior to the end of the administration.
- The ArchiveSocial tool included the ability to capture direct messages that may have been used on the platforms, but the Trump Administration opted not to enable capture of direct messages, and was unable to report whether direct messaging was actually used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we think contain presidential record information, but were not captured by the Trump Administration. These accounts belonged to Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro. After the end of the administration, NARA obtained the publicly available tweets from these accounts in order to supplement its archival collection.
- In January 2021, administration officials advised NARA that two social media accounts they thought contained Presidential record content were not enrolled in ArchiveSocial and could not be retroactively enrolled as they had been suspended by the platforms. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook, which operates Instagram, to obtain access to the accounts, but Facebook was not able to provide access.
- SnapChat was used by the Trump Administration, (@realdonaldtrump and @whitehouse), which advised NARA that it was capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump Administration used the @whitehouse account approximately five times during four years. However, the administration regularly used the @realdonaldtrump account. News reports indicate that the account had 1.5 million followers on the platform. We do not know whether direct messaging was enabled on the account. We are not able to determine to what extent @realdonaldtrump SnapChat contained unique Presidential records as compared to content duplicative from other platforms, or purely campaign related material which would not have been a Presidential record.

Please let me know when you would like to discuss further.

(b) (6), (b) (7)(C), (b) (5)

Also, here's additional background on the social media issues we discussed. On page 2 of the [Archivist's March 30, 2017, response to queries from Senators McCaskill and Carper](#), he stated that "NARA has advised the White House that it should capture and preserve all tweets that the President posts in the course of his official duties, including those that are subsequently deleted, as Presidential records, and NARA has been informed by White House officials that they are, in fact, doing so." (b) (5)

- No steps were taken to capture deleted content from any Trump Administration social media records other than @realDonaldTrump until the Administration procured a third party social media archiving tool in February 2018. After that, use of the tool was widespread but not timely. For example, most accounts were eventually enrolled but may have been active for weeks, months, or years prior to enrollment, during which time deleted content was not captured.
- At the end of the administration, NARA learned that the White House stopped using the social media archiving tool to capture deleted Tweets in April 2020, and Twitter was unable to provide the deleted Tweets to us after the fact. Accordingly, NARA was unable to obtain a complete set of these Presidential records from the White House. NARA is considering utilizing what was collected by non-governmental sources as an adjunct to our archival collection.
- The third party tool used to capture social media content from Twitter, Instagram, and Facebook included the ability to capture direct messages on the platforms. The Administration opted not to enable capture of direct messages, but was unable to report whether direct messaging was used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we believe contain PRA records but were not captured by the Trump Administration. NARA obtained the publicly available tweets at the end of the administration through a third party to supplement its archival collection. These include accounts from Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro.
- In its last weeks, the Trump Administration advised NARA that two social media accounts it believed should be treated as containing PRA content were not enrolled in their third party archiving tool and could not be retroactively enrolled. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with

Facebook to obtain access to the accounts but was never able to do so.

- SnapChat was used by the Trump Administration (realdonaldtrump and whitehouse), and NARA was advised that they were capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump administration used the White House account approximately five times during four years. However, the realdonaldtrump account was used regularly. News reports indicate the account had 1.5 million followers on the platform. It is not known whether direct messaging was enabled on the account.

Subject: Need for Assistance re Presidential Records

(b) (6), (b) (7)(C):

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with (b) (6), (b) (7)(C) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of

NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,

Gary

NARA did not receive, all of the Presidential records created by President Trump and White House staff that were posted on social media platforms, as summarized in more detail below:

- Early in the Trump Administration, questions were raised about President Trump's use of his personal Twitter account to conduct official government business and whether deleted tweets were being captured and preserved as Presidential records. In March 2017, NARA advised the Trump Administration that it should capture and preserve as Presidential records all tweets that the President posts in the course of his official duties, whether on his personal @realDonaldTrump account or on the official @POTUS account, including those tweets that were subsequently deleted. As I reported in a March 30, 2017, letter to Senators Claire McCaskill and Tom Carper, NARA was "informed by White House officials that they [were], in fact, doing so."

Since the end of the administration, we have learned that the White House initially used a manual process to capture tweets that were deleted from @realDonaldTrump and @POTUS by copying them from non-governmental organizations that were capturing them, such as Propublica and Factba.se. The White House did not begin using the vendor ArchiveSocial to automate the capture of tweets and other social media records in real-time until January 2018. Moreover, @realDonaldTrump was not enrolled until August 2018 and the tool stopped capturing @realDonaldTrump in April 2020. The official @POTUS was enrolled in February 2018 and remained connected throughout the rest of the administration.

When properly implemented, ArchiveSocial captures all versions of content as it appears on the platforms, along with any changes, such as deleted or edited content, changes to an account profile, and direct or private messages. However, it cannot capture such changes retroactively. If a social media account is not enrolled or subsequently becomes disconnected from ArchiveSocial, any changes, including deleted or modified posts, cannot be captured.

The Twitter account @realDonaldTrump was disconnected from ArchiveSocial in April 2020. A key feature of ArchiveSocial is that it sends automated alerts to the account owners/system administrators every three to five days to remind them to reconnect any disconnected accounts. The tool also displays information about the account status in the dashboard. It appears that Trump Administration officials failed to respond to these frequent and repeated alerts and never re-enrolled that account.

When White House officials brought this problem to our attention near the end of the administration, Twitter had permanently suspended @realDonaldTrump. NARA contacted Twitter directly to ask if it retained the account data between April 20th and the account's suspension. Twitter provided us with a copy of the available account data. However, it did not include previously deleted tweets, which are not retained by the company. Accordingly, we were unable to obtain a complete set of these Presidential records from the Trump Administration or Twitter. While we do have access to copies of deleted tweets collected by other non-governmental sources, we do not consider them as official Presidential records and cannot ensure the completeness of their captured account data.

- The Trump White House did not take any steps to capture deleted content from any Trump Administration social media account other than @realDonaldTrump or @POTUS prior to enrolling them with ArchiveSocial. As with @realDonaldTrump, many other Trump Administration social media accounts were not enrolled until the summer or fall of 2018, even though these accounts were active for over a year prior to enrollment, during which time deleted or modified Presidential record content was not captured. Other accounts were not enrolled until just prior to the end of the administration.
- The ArchiveSocial tool included the ability to capture direct messages that may have been used on the platforms, but the Trump Administration opted not to enable capture of direct messages, and was unable to report whether direct messaging was actually used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we think contain presidential record information, but were not captured by the Trump Administration. These accounts belonged to Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro. After the end of the administration, NARA obtained the publicly available tweets from these accounts in order to supplement its archival collection.
- In January 2021, administration officials advised NARA that two social media accounts they thought contained Presidential record content were not enrolled in ArchiveSocial and could not be retroactively enrolled as they had been suspended by the platforms. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook, which operates Instagram, to obtain access to the accounts, but Facebook was not able to provide access.
- SnapChat was used by the Trump Administration, (@realdonaldtrump and @whitehouse), which advised NARA that it was capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump Administration used the @whitehouse account approximately five times during four years. However, the administration regularly used the @realdonaldtrump account. News reports indicate that the account had 1.5 million followers on the platform. We do not know whether direct messaging was enabled on the account. We are not

able to determine to what extent @realdonaldtrump SnapChat contained unique Presidential records as compared to content duplicative from other platforms, or purely campaign related material which would not have been a Presidential record.

Please let me know when you would like to discuss further.

Thanks,
Gary

(b) (6), (b) (7)(C), (b) (5)

Also, here's additional background on the social media issues we discussed. On page 2 of the [Archivist's March 30, 2017, response to queries from Senators McCaskill and Carper](#), he stated that "NARA has advised the White House that it should capture and preserve all tweets that the President posts in the course of his official duties, including those that are subsequently deleted, as Presidential records, and NARA has been informed by White House officials that they are, in fact, doing so." (b) (5)

- No steps were taken to capture deleted content from any Trump Administration social media records other than @realDonaldTrump until the Administration procured a third party social media archiving tool in February 2018. After that, use of the tool was widespread but not timely. For example, most accounts were eventually enrolled but may have been active for weeks, months, or years prior to enrollment, during which time deleted content was not captured.
- At the end of the administration, NARA learned that the White House stopped using the social media archiving tool to capture deleted Tweets in April 2020, and Twitter was unable to provide the deleted Tweets to us after the fact. Accordingly, NARA was unable to obtain a complete set of these Presidential records from the White House. NARA is considering utilizing what was collected by non-governmental sources as an adjunct to our archival collection.
- The third party tool used to capture social media content from Twitter, Instagram, and Facebook included the ability to capture direct messages on the platforms. The Administration opted not to enable capture of direct messages, but was unable to report whether direct messaging was used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we believe contain PRA records but were not captured by the Trump Administration. NARA obtained the publicly available tweets at the end of the administration through a third party to supplement its archival collection. These include accounts from Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro.

- In its last weeks, the Trump Administration advised NARA that two social media accounts it believed should be treated as containing PRA content were not enrolled in their third party archiving tool and could not be retroactively enrolled. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook to obtain access to the accounts but was never able to do so.
- SnapChat was used by the Trump Administration (realdonaldtrump and whitehouse), and NARA was advised that they were capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump administration used the White House account approximately five times during four years. However, the realdonaldtrump account was used regularly. News reports indicate the account had 1.5 million followers on the platform. It is not known whether direct messaging was enabled on the account.

Subject: Need for Assistance re Presidential Records

(b) (6), (b) (7)(C):

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with (b) (6), (b) (7)(C) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,

Gary

On Mon, Oct 18, 2021 at 10:48 AM GaryM Stem <garym.stem@nara.gov> wrote:

(b) (5), (b) (6), (b) (7)(C) [REDACTED]:

NARA did not receive, all of the Presidential records created by President Trump and White House staff that were posted on social media platforms, as summarized in more detail below:

- Early in the Trump Administration, questions were raised about President Trump's use of his personal Twitter account to conduct official government business and whether deleted tweets were being captured and preserved as Presidential records. In March 2017, NARA advised the Trump Administration that it should capture and preserve as Presidential records all tweets that the President posts in the course of his official duties, whether on his personal @realDonaldTrump account or on the official @POTUS account, including those tweets that were subsequently deleted. As I reported in a March 30, 2017, letter to Senators Claire McCaskill and Tom Carper, NARA was "informed by White House officials that they [were], in fact, doing so."

Since the end of the administration, we have learned that the White House initially used a manual process to capture tweets that were deleted from @realDonaldTrump and @POTUS by copying them from non-governmental organizations that were capturing them, such as Propublica and Factba.se. The White House did not begin using the vendor ArchiveSocial to automate the capture of tweets and other social media records in real-time until January 2018. Moreover, @realDonaldTrump was not enrolled until August 2018 and the tool stopped capturing @realDonaldTrump in April 2020. The official @POTUS was enrolled in February 2018 and remained connected throughout the rest of the administration.

When properly implemented, ArchiveSocial captures all versions of content as it appears on the platforms, along with any changes, such as deleted or edited content, changes to an account profile, and direct or private messages. However, it cannot capture such changes retroactively. If a social media account is not enrolled or subsequently becomes disconnected from ArchiveSocial, any changes, including deleted or modified posts, cannot be captured.

The Twitter account @realDonaldTrump was disconnected from ArchiveSocial in April 2020. A key feature of ArchiveSocial is that it sends automated alerts to the account owners/system administrators every three to five days to remind them to reconnect any disconnected accounts. The tool also displays information about the account status in the dashboard. It appears that Trump Administration officials failed to respond to these frequent and repeated alerts and never re-enrolled that account.

When White House officials brought this problem to our attention near the end of the administration, Twitter had permanently suspended @realDonaldTrump. NARA contacted Twitter directly to ask if it retained the account data between April 20th and the account's suspension. Twitter provided us with a copy of the available account data. However, it did not include previously deleted tweets, which are not retained by the company. Accordingly, we were unable to obtain a complete set of these Presidential records from the Trump Administration or Twitter. While we do have access to copies of deleted tweets collected by other non-governmental sources, we do not consider them as official Presidential records and cannot ensure the completeness of their captured account data.

- The Trump White House did not take any steps to capture deleted content from any Trump Administration social media account other than @realDonaldTrump or @POTUS prior to enrolling them with ArchiveSocial. As with @realDonaldTrump, many other Trump Administration social media accounts were not enrolled until the summer or fall of 2018, even though these accounts were active for over a year prior to enrollment, during which time deleted or modified Presidential record content was not captured. Other accounts were not enrolled until just prior to the end of the administration.
- The ArchiveSocial tool included the ability to capture direct messages that may have been used on the platforms, but the Trump Administration opted not to enable capture of direct messages, and was unable to report whether direct messaging was actually used on any of the platforms by the account holders.

- NARA identified seven Twitter accounts that we think contain presidential record information, but were not captured by the Trump Administration. These accounts belonged to Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro. After the end of the administration, NARA obtained the publicly available tweets from these accounts in order to supplement its archival collection.
- In January 2021, administration officials advised NARA that two social media accounts they thought contained Presidential record content were not enrolled in ArchiveSocial and could not be retroactively enrolled as they had been suspended by the platforms. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook, which operates Instagram, to obtain access to the accounts, but Facebook was not able to provide access.
- SnapChat was used by the Trump Administration, (@realDonaldTrump and @whitehouse), which advised NARA that it was capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump Administration used the @whitehouse account approximately five times during four years. However, the administration regularly used the @realDonaldTrump account. News reports indicate that the account had 1.5 million followers on the platform. We do not know whether direct messaging was enabled on the account. We are not able to determine to what extent @realDonaldTrump SnapChat contained unique Presidential records as compared to content duplicative from other platforms, or purely campaign related material which would not have been a Presidential record.

Please let me know when you would like to discuss further.

Thanks,
Gary

(b) (6), (b) (7)(C), (b) (5)

Also, here's additional background on the social media issues we discussed. On page 2 of the [Archivist's March 30, 2017, response to queries from Senators McCaskill and Carper](#), he stated that "NARA has advised the White House that it should capture and preserve all tweets that the President posts in the course of his official duties, including those that are subsequently deleted, as Presidential records, and NARA has been informed by White House officials that they are, in fact, doing so." (b) (5)

- No steps were taken to capture deleted content from any Trump Administration social media records other than @realDonaldTrump until the Administration procured a third party social media archiving tool in February 2018. After that, use of the tool was

widespread but not timely. For example, most accounts were eventually enrolled but may have been active for weeks, months, or years prior to enrollment, during which time deleted content was not captured.

- At the end of the administration, NARA learned that the White House stopped using the social media archiving tool to capture deleted Tweets in April 2020, and Twitter was unable to provide the deleted Tweets to us after the fact. Accordingly, NARA was unable to obtain a complete set of these Presidential records from the White House. NARA is considering utilizing what was collected by non-governmental sources as an adjunct to our archival collection.
- The third party tool used to capture social media content from Twitter, Instagram, and Facebook included the ability to capture direct messages on the platforms. The Administration opted not to enable capture of direct messages, but was unable to report whether direct messaging was used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we believe contain PRA records but were not captured by the Trump Administration. NARA obtained the publicly available tweets at the end of the administration through a third party to supplement its archival collection. These include accounts from Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro.
- In its last weeks, the Trump Administration advised NARA that two social media accounts it believed should be treated as containing PRA content were not enrolled in their third party archiving tool and could not be retroactively enrolled. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook to obtain access to the accounts but was never able to do so.
- SnapChat was used by the Trump Administration (realdonaldtrump and whitehouse), and NARA was advised that they were capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump administration used the White House account approximately five times during four years. However, the realdonaldtrump account was used regularly. News reports indicate the account had 1.5 million followers on the platform. It is not known whether direct messaging was enabled on the account.

Subject: Need for Assistance re Presidential Records

^{(b) (6), (b) (7)(C)}:

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with (b) (6), (b) (7) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,
Gary

On Mon, Oct 18, 2021 at 10:48 AM GaryM Stern <garym.stern@nara.gov> wrote:

(b) (5), (b) (6), (b) (7)(C)
:

NARA did not receive, all of the Presidential records created by President Trump and White House staff that were posted on social media platforms, as summarized in more detail below:

- Early in the Trump Administration, questions were raised about President Trump's use of his personal Twitter account to conduct official government business and whether deleted tweets were being captured and preserved as Presidential records. In March 2017, NARA advised the Trump Administration that it should capture and preserve as Presidential records all tweets that the President posts in the course of his official duties, whether on his personal @realDonaldTrump account or on the official @POTUS account, including those tweets that were subsequently deleted. As I reported in a March 30, 2017, letter to Senators Claire McCaskill and Tom Carper, NARA was "informed by White House officials that they [were], in fact, doing so."

Since the end of the administration, we have learned that the White House initially used a manual process to capture tweets that were deleted from @realDonaldTrump and @POTUS by copying them from non-governmental organizations that were capturing them, such as ProPublica and Factba.se. The White House did not begin using the vendor ArchiveSocial to automate the capture of tweets and other social media records in real-time until January 2018. Moreover, @realDonaldTrump was not enrolled until August 2018 and the tool stopped capturing @realDonaldTrump in April 2020. The official @POTUS was enrolled in February 2018 and remained connected throughout the rest of the administration.

When properly implemented, ArchiveSocial captures all versions of content as it appears on the platforms, along with any changes, such as deleted or edited content, changes to an account profile, and direct or private messages. However, it cannot capture such changes retroactively. If a social media account is not enrolled or subsequently becomes disconnected from ArchiveSocial, any changes, including deleted or modified posts, cannot be captured.

The Twitter account @realDonaldTrump was disconnected from ArchiveSocial in April 2020. A key feature of ArchiveSocial is that it sends automated alerts to the account owners/system

administrators every three to five days to remind them to reconnect any disconnected accounts. The tool also displays information about the account status in the dashboard. It appears that Trump Administration officials failed to respond to these frequent and repeated alerts and never re-enrolled that account.

When White House officials brought this problem to our attention near the end of the administration, Twitter had permanently suspended @realDonaldTrump. NARA contacted Twitter directly to ask if it retained the account data between April 20th and the account's suspension. Twitter provided us with a copy of the available account data. However, it did not include previously deleted tweets, which are not retained by the company. Accordingly, we were unable to obtain a complete set of these Presidential records from the Trump Administration or Twitter. While we do have access to copies of deleted tweets collected by other non-governmental sources, we do not consider them as official Presidential records and cannot ensure the completeness of their captured account data.

- The Trump White House did not take any steps to capture deleted content from any Trump Administration social media account other than @realDonaldTrump or @POTUS prior to enrolling them with ArchiveSocial. As with @realDonaldTrump, many other Trump Administration social media accounts were not enrolled until the summer or fall of 2018, even though these accounts were active for over a year prior to enrollment, during which time deleted or modified Presidential record content was not captured. Other accounts were not enrolled until just prior to the end of the administration.
- The ArchiveSocial tool included the ability to capture direct messages that may have been used on the platforms, but the Trump Administration opted not to enable capture of direct messages, and was unable to report whether direct messaging was actually used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we think contain presidential record information, but were not captured by the Trump Administration. These accounts belonged to Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro. After the end of the administration, NARA obtained the publicly available tweets from these accounts in order to supplement its archival collection.
- In January 2021, administration officials advised NARA that two social media accounts they thought contained Presidential record content were not enrolled in ArchiveSocial and could not be retroactively enrolled as they had been suspended by the platforms. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook, which operates Instagram, to obtain access to the accounts, but Facebook was not able to provide access.
- SnapChat was used by the Trump Administration, (@realdonaldtrump and @whitehouse), which advised NARA that it was capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump Administration used the @whitehouse account approximately five times during four years. However, the administration regularly used the @realdonaldtrump account. News reports indicate that the account had 1.5 million followers on the platform. We do not know whether direct messaging was enabled on the account. We are not able to determine to what extent @realdonaldtrump SnapChat contained unique Presidential records as compared to content duplicative from other platforms, or purely campaign related material which would not have been a Presidential record.

Please let me know when you would like to discuss further.

Thanks,
Gary

(b) (6), (b) (7)(C), (b) (5)

Also, here's additional background on the social media issues we discussed. On page 2 of the [Archivist's March 30, 2017, response to queries from Senators McCaskill and Carper](#), he stated that "NARA has advised the White House that it should capture and preserve all tweets that the President posts in the course of his official duties, including those that are subsequently deleted, as Presidential records, and NARA has been informed by White House officials that they are, in fact, doing so." (b) (5)

- No steps were taken to capture deleted content from any Trump Administration social media records other than @realDonaldTrump until the Administration procured a third party social media archiving tool in February 2018. After that, use of the tool was widespread but not timely. For example, most accounts were eventually enrolled but may have been active for weeks, months, or years prior to enrollment, during which time deleted content was not captured.
- At the end of the administration, NARA learned that the White House stopped using the social media archiving tool to capture deleted Tweets in April 2020, and Twitter was unable to provide the deleted Tweets to us after the fact. Accordingly, NARA was unable to obtain a complete set of these Presidential records from the White House. NARA is considering utilizing what was collected by non-governmental sources as an adjunct to our archival collection.
- The third party tool used to capture social media content from Twitter, Instagram, and Facebook included the ability to capture direct messages on the platforms. The Administration opted not to enable capture of direct messages, but was unable to report whether direct messaging was used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we believe contain PRA records but were not captured by the Trump Administration. NARA obtained the publicly available tweets at the end of the administration through a third party to supplement its archival collection. These include accounts from Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro.
- In its last weeks, the Trump Administration advised NARA that two social media accounts it believed should be treated as containing PRA content were not enrolled in their third party archiving tool and could not be retroactively enrolled. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook to obtain access to the accounts but was never able to do so.
- SnapChat was used by the Trump Administration (realdonaldtrump and whitehouse), and NARA was advised that they were capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned

President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump administration used the White House account approximately five times during four years. However, the realdonaldtrump account was used regularly. News reports indicate the account had 1.5 million followers on the platform. It is not known whether direct messaging was enabled on the account.

Subject: Need for Assistance re Presidential Records

(b) (6), (b) (7)(C):

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with (b) (6), (b) (7)(C) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this

one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,
Gary

(b) (5), (b) (6), (b) (7)(C)
(b) (5):

NARA did not receive, all of the Presidential records created by President Trump and White House staff that were posted on social media platforms, as summarized in more detail below:

- Early in the Trump Administration, questions were raised about President Trump's use of his personal Twitter account to conduct official government business and whether deleted tweets were being captured and preserved as Presidential records. In March 2017, NARA advised the Trump Administration that it should capture and preserve as Presidential records all tweets that the President posts in the course of his official duties, whether on his personal @realDonaldTrump account or on the official @POTUS account, including those tweets that were subsequently deleted. As I reported in a March 30, 2017, letter to Senators Claire McCaskill and Tom Carper, NARA was "informed by White House officials that they [were], in fact, doing so."

Since the end of the administration, we have learned that the White House initially used a manual process to capture tweets that were deleted from @realDonaldTrump and @POTUS by copying them from non-governmental organizations that were capturing them, such as Propublica and Factba.se. The White House did not begin using the vendor ArchiveSocial to automate the capture of tweets and other social media records in real-time until January 2018. Moreover, @realDonaldTrump was not enrolled until August 2018 and the tool stopped capturing @realDonaldTrump in April 2020. The official @POTUS was enrolled in

February 2018 and remained connected throughout the rest of the administration.

When properly implemented, ArchiveSocial captures all versions of content as it appears on the platforms, along with any changes, such as deleted or edited content, changes to an account profile, and direct or private messages. However, it cannot capture such changes retroactively. If a social media account is not enrolled or subsequently becomes disconnected from ArchiveSocial, any changes, including deleted or modified posts, cannot be captured.

The Twitter account @realDonaldTrump was disconnected from ArchiveSocial in April 2020. A key feature of ArchiveSocial is that it sends automated alerts to the account owners/system administrators every three to five days to remind them to reconnect any disconnected accounts. The tool also displays information about the account status in the dashboard. It appears that Trump Administration officials failed to respond to these frequent and repeated alerts and never re-enrolled that account.

When White House officials brought this problem to our attention near the end of the administration, Twitter had permanently suspended @realDonaldTrump. NARA contacted Twitter directly to ask if it retained the account data between April 20th and the account's suspension. Twitter provided us with a copy of the available account data. However, it did not include previously deleted tweets, which are not retained by the company. Accordingly, we were unable to obtain a complete set of these Presidential records from the Trump Administration or Twitter. While we do have access to copies of deleted tweets collected by other non-governmental sources, we do not consider them as official Presidential records and cannot ensure the completeness of their captured account data.

- The Trump White House did not take any steps to capture deleted content from any Trump Administration social media account other than @realDonaldTrump or @POTUS prior to enrolling them with ArchiveSocial. As with @realDonaldTrump, many other Trump Administration social media accounts were not enrolled until the summer or fall of 2018, even though these accounts were active for over a year prior to enrollment, during which time deleted or modified Presidential record content was not captured. Other accounts were not enrolled until just prior to the end of the administration.
- The ArchiveSocial tool included the ability to capture direct messages that may have been used on the platforms, but the Trump Administration opted not to enable capture of direct messages, and was unable to report whether direct messaging was actually used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we think contain presidential record information, but were not captured by the Trump Administration. These accounts belonged to Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro. After the end of the administration, NARA obtained the publicly available tweets from these accounts in order to supplement its archival collection.
- In January 2021, administration officials advised NARA that two social media accounts they thought contained Presidential record content were not enrolled in ArchiveSocial and could not be retroactively enrolled as they had been suspended by the platforms. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook, which operates Instagram, to obtain access to the accounts, but Facebook was not able to provide access.
- SnapChat was used by the Trump Administration, (@realdonaldtrump and @whitehouse), which advised NARA that it was capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump Administration used the @whitehouse

account approximately five times during four years. However, the administration regularly used the @realdonaldtrump account. News reports indicate that the account had 1.5 million followers on the platform. We do not know whether direct messaging was enabled on the account. We are not able to determine to what extent @realdonaldtrump SnapChat contained unique Presidential records as compared to content duplicative from other platforms, or purely campaign related material which would not have been a Presidential record.

Please let me know when you would like to discuss further.

Thanks,
Gary

On Mon, Sep 6, 2021 at 11:59 AM GaryM Stern <garym.stern@nara.gov> wrote:

(b) (6), (b) (7)(C), (b) (5)

Also, here's additional background on the social media issues we discussed. On page 2 of the [Archivist's March 30, 2017, response to queries from Senators McCaskill and Carper](#), he stated that "NARA has advised the White House that it should capture and preserve all tweets that the President posts in the course of his official duties, including those that are subsequently deleted, as Presidential records, and NARA has been informed by White House officials that they are, in fact, doing so." (b) (5)

- No steps were taken to capture deleted content from any Trump Administration social media records other than @realDonaldTrump until the Administration procured a third party social media archiving tool in February 2018. After that, use of the tool was widespread but not timely. For example, most accounts were eventually enrolled but may have been active for weeks, months, or years prior to enrollment, during which time deleted content was not captured.
- At the end of the administration, NARA learned that the White House stopped using the social media archiving tool to capture deleted Tweets in April 2020, and Twitter was unable to provide the deleted Tweets to us after the fact. Accordingly, NARA was unable to obtain a complete set of these Presidential records from the White House. NARA is considering utilizing what was collected by non-governmental sources as an adjunct to our archival collection.
- The third party tool used to capture social media content from Twitter, Instagram, and Facebook included the ability to capture direct messages on the platforms. The Administration opted not to enable capture of direct messages, but was unable to report whether direct messaging was used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we believe contain PRA records but were not captured by the Trump Administration. NARA obtained the publicly available tweets at the end of the administration through a third party to supplement its archival collection.

These include accounts from Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro.

- In its last weeks, the Trump Administration advised NARA that two social media accounts it believed should be treated as containing PRA content were not enrolled in their third party archiving tool and could not be retroactively enrolled. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook to obtain access to the accounts but was never able to do so.
- SnapChat was used by the Trump Administration (realdonaldtrump and whitehouse), and NARA was advised that they were capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump administration used the White House account approximately five times during four years. However, the realdonaldtrump account was used regularly. News reports indicate the account had 1.5 million followers on the platform. It is not known whether direct messaging was enabled on the account.

Subject: Need for Assistance re Presidential Records

(b) (6), (b) (7)(C):

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with (b) (6), (b) (7)(C) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7)(C) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,

Gary

:

NARA did not receive, all of the Presidential records created by President Trump and White House staff that were posted on social media platforms, as summarized in more detail below:

- Early in the Trump Administration, questions were raised about President Trump's use of his personal Twitter account to conduct official government business and whether deleted tweets were being captured and preserved as Presidential records. In March 2017, NARA advised the Trump Administration that it should capture and preserve as Presidential records all tweets that the President posts in the course of his official duties, whether on his personal @realDonaldTrump account or on the official @POTUS account, including those tweets that were subsequently deleted. As I reported in a March 30, 2017, letter to Senators Claire McCaskill and Tom Carper, NARA was "informed by White House officials that they [were], in fact, doing so."

Since the end of the administration, we have learned that the White House initially used a manual process to capture tweets that were deleted from @realDonaldTrump and @POTUS by copying them from non-governmental organizations that were capturing them, such as Propublica and Factba.se. The White House did not begin using the vendor ArchiveSocial to automate the capture of tweets and other social media records in real-time until January 2018. Moreover, @realDonaldTrump was not enrolled until August 2018 and the tool stopped capturing @realDonaldTrump in April 2020. The official @POTUS was enrolled in February 2018 and remained connected throughout the rest of the administration.

When properly implemented, ArchiveSocial captures all versions of content as it appears on the platforms, along with any changes, such as deleted or edited content, changes to an account profile, and direct or private messages. However, it cannot capture such changes retroactively. If a social media account is not enrolled or subsequently becomes disconnected from ArchiveSocial, any changes, including deleted or modified posts, cannot be captured.

The Twitter account @realDonaldTrump was disconnected from ArchiveSocial in April 2020. A key feature of ArchiveSocial is that it sends automated alerts to the account owners/system administrators every three to five days to remind them to reconnect any disconnected accounts. The tool also displays information about the account status in the dashboard. It appears that Trump Administration officials failed to respond to these frequent and repeated alerts and never re-enrolled that account.

When White House officials brought this problem to our attention near the end of the administration, Twitter had permanently suspended @realDonaldTrump. NARA contacted Twitter directly to ask if it retained the account data between April 20th and the account's suspension. Twitter provided us with a copy of the available account data. However, it did not include previously deleted tweets, which are not retained by the company. Accordingly, we were unable to obtain a complete set of these Presidential records from the Trump Administration or Twitter. While we do have access to copies of deleted tweets collected by other non-governmental sources, we do not consider them as official Presidential records and cannot ensure the completeness of their captured account data.

- The Trump White House did not take any steps to capture deleted content from any Trump Administration social media account other than @realDonaldTrump or @POTUS prior to enrolling them with ArchiveSocial. As with @realDonaldTrump, many other Trump Administration social media accounts were not enrolled until the summer or fall of 2018, even though these accounts were active for over a year prior to enrollment, during which

time deleted or modified Presidential record content was not captured. Other accounts were not enrolled until just prior to the end of the administration.

- The ArchiveSocial tool included the ability to capture direct messages that may have been used on the platforms, but the Trump Administration opted not to enable capture of direct messages, and was unable to report whether direct messaging was actually used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we think contain presidential record information, but were not captured by the Trump Administration. These accounts belonged to Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro. After the end of the administration, NARA obtained the publicly available tweets from these accounts in order to supplement its archival collection.
- In January 2021, administration officials advised NARA that two social media accounts they thought contained Presidential record content were not enrolled in ArchiveSocial and could not be retroactively enrolled as they had been suspended by the platforms. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook, which operates Instagram, to obtain access to the accounts, but Facebook was not able to provide access.
- SnapChat was used by the Trump Administration, (@realDonaldTrump and @whitehouse), which advised NARA that it was capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump Administration used the @whitehouse account approximately five times during four years. However, the administration regularly used the @realDonaldTrump account. News reports indicate that the account had 1.5 million followers on the platform. We do not know whether direct messaging was enabled on the account. We are not able to determine to what extent @realDonaldTrump SnapChat contained unique Presidential records as compared to content duplicative from other platforms, or purely campaign related material which would not have been a Presidential record.

Please let me know when you would like to discuss further.

Thanks,
Gary

[REDACTED]

Also, here's additional background on the social media issues we discussed. On page 2 of the

[Archivist's March 30, 2017, response to queries from Senators McCaskill and Carper](#), he stated that "NARA has advised the White House that it should capture and preserve all tweets that the President posts in the course of his official duties, including those that are subsequently deleted, as Presidential records, and NARA has been informed by White House officials that they are, in fact, doing so." (b) (5)

- No steps were taken to capture deleted content from any Trump Administration social media records other than @realDonaldTrump until the Administration procured a third party social media archiving tool in February 2018. After that, use of the tool was widespread but not timely. For example, most accounts were eventually enrolled but may have been active for weeks, months, or years prior to enrollment, during which time deleted content was not captured.
- At the end of the administration, NARA learned that the White House stopped using the social media archiving tool to capture deleted Tweets in April 2020, and Twitter was unable to provide the deleted Tweets to us after the fact. Accordingly, NARA was unable to obtain a complete set of these Presidential records from the White House. NARA is considering utilizing what was collected by non-governmental sources as an adjunct to our archival collection.
- The third party tool used to capture social media content from Twitter, Instagram, and Facebook included the ability to capture direct messages on the platforms. The Administration opted not to enable capture of direct messages, but was unable to report whether direct messaging was used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we believe contain PRA records but were not captured by the Trump Administration. NARA obtained the publicly available tweets at the end of the administration through a third party to supplement its archival collection. These include accounts from Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro.
- In its last weeks, the Trump Administration advised NARA that two social media accounts it believed should be treated as containing PRA content were not enrolled in their third party archiving tool and could not be retroactively enrolled. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook to obtain access to the accounts but was never able to do so.
- SnapChat was used by the Trump Administration (realdonaldtrump and whitehouse), and NARA was advised that they were capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump administration used the White House account approximately five times during four years. However, the realdonaldtrump account was used regularly. News reports indicate the account had 1.5 million followers on the platform. It is not known whether direct messaging was enabled on the account.

Subject: Need for Assistance re Presidential Records

(b) (6), (b) (7)(C):

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in resolving. We have already been working with (b) (6), (b) (7)(C) to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen

boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by (b) (6), (b) (7)(C) in the final days of the Administration that they need to be. I had also raised this concern with (b) (6), (b) (7)(C) during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,

Gary

NARA did not receive, all of the Presidential records created by President Trump and White House staff that were posted on social media platforms, as summarized in more detail below:

- Early in the Trump Administration, questions were raised about President Trump's use of his personal Twitter account to conduct official government business and whether deleted tweets were being captured and preserved as Presidential records. In March 2017, NARA advised the Trump Administration that it should capture and preserve as Presidential records all tweets that the President posts in the course of his official duties, whether on his personal @realDonaldTrump account or on the official @POTUS account, including those tweets that were subsequently deleted. As I reported in a March 30, 2017, letter to Senators Claire McCaskill and Tom Carper, NARA was "informed by White House officials that they [were], in fact, doing so."

Since the end of the administration, we have learned that the White House initially used a manual process to capture tweets that were deleted from @realDonaldTrump and @POTUS by copying them from non-governmental organizations that were capturing them, such as ProPublica and Factba.se. The White House did not begin using the vendor ArchiveSocial to automate the capture of tweets and other social media records in real-time until January 2018. Moreover, @realDonaldTrump was not enrolled until August 2018 and the tool stopped capturing @realDonaldTrump in April 2020. The official @POTUS was enrolled in February 2018 and remained connected throughout the rest of the administration.

When properly implemented, ArchiveSocial captures all versions of content as it appears on the platforms, along with any changes, such as deleted or edited content, changes to an

account profile, and direct or private messages. However, it cannot capture such changes retroactively. If a social media account is not enrolled or subsequently becomes disconnected from ArchiveSocial, any changes, including deleted or modified posts, cannot be captured.

The Twitter account @realDonaldTrump was disconnected from ArchiveSocial in April 2020. A key feature of ArchiveSocial is that it sends automated alerts to the account owners/system administrators every three to five days to remind them to reconnect any disconnected accounts. The tool also displays information about the account status in the dashboard. It appears that Trump Administration officials failed to respond to these frequent and repeated alerts and never re-enrolled that account.

When White House officials brought this problem to our attention near the end of the administration, Twitter had permanently suspended @realDonaldTrump. NARA contacted Twitter directly to ask if it retained the account data between April 20th and the account's suspension. Twitter provided us with a copy of the available account data. However, it did not include previously deleted tweets, which are not retained by the company.

Accordingly, we were unable to obtain a complete set of these Presidential records from the Trump Administration or Twitter. While we do have access to copies of deleted tweets collected by other non-governmental sources, we do not consider them as official Presidential records and cannot ensure the completeness of their captured account data.

- The Trump White House did not take any steps to capture deleted content from any Trump Administration social media account other than @realDonaldTrump or @POTUS prior to enrolling them with ArchiveSocial. As with @realDonaldTrump, many other Trump Administration social media accounts were not enrolled until the summer or fall of 2018, even though these accounts were active for over a year prior to enrollment, during which time deleted or modified Presidential record content was not captured. Other accounts were not enrolled until just prior to the end of the administration.
- The ArchiveSocial tool included the ability to capture direct messages that may have been used on the platforms, but the Trump Administration opted not to enable capture of direct messages, and was unable to report whether direct messaging was actually used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we think contain presidential record information, but were not captured by the Trump Administration. These accounts belonged to Andrew Giuliani, Chad Gilmartin, Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro. After the end of the administration, NARA obtained the publicly available tweets from these accounts in order to supplement its archival collection.
- In January 2021, administration officials advised NARA that two social media accounts they thought contained Presidential record content were not enrolled in ArchiveSocial and could not be retroactively enrolled as they had been suspended by the platforms. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook, which operates Instagram, to obtain access to the accounts, but Facebook was not able to provide access.
- SnapChat was used by the Trump Administration, (@realdonaldtrump and @whitehouse), which advised NARA that it was capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump Administration used the @whitehouse account approximately five times during four years. However, the administration regularly used the @realdonaldtrump account. News reports indicate that the account had 1.5 million followers on the platform. We do not know whether direct

messaging was enabled on the account. We are not able to determine to what extent @realdonaldtrump SnapChat contained unique Presidential records as compared to content duplicative from other platforms, or purely campaign related material which would not have been a Presidential record.

Please let me know when you would like to discuss further.

Thanks,
Gary

(b) (6), (b) (7)(C), (b) (5)

Also, here's additional background on the social media issues we discussed. On page 2 of the [Archivist's March 30, 2017, response to queries from Senators McCaskill and Carper](#), he stated that "NARA has advised the White House that it should capture and preserve all tweets that the President posts in the course of his official duties, including those that are subsequently deleted, as Presidential records, and NARA has been informed by White House officials that they are, in fact, doing so." (b) (5)

- No steps were taken to capture deleted content from any Trump Administration social media records other than @realDonaldTrump until the Administration procured a third party social media archiving tool in February 2018. After that, use of the tool was widespread but not timely. For example, most accounts were eventually enrolled but may have been active for weeks, months, or years prior to enrollment, during which time deleted content was not captured.
- At the end of the administration, NARA learned that the White House stopped using the social media archiving tool to capture deleted Tweets in April 2020, and Twitter was unable to provide the deleted Tweets to us after the fact. Accordingly, NARA was unable to obtain a complete set of these Presidential records from the White House. NARA is considering utilizing what was collected by non-governmental sources as an adjunct to our archival collection.
- The third party tool used to capture social media content from Twitter, Instagram, and Facebook included the ability to capture direct messages on the platforms. The Administration opted not to enable capture of direct messages, but was unable to report whether direct messaging was used on any of the platforms by the account holders.
- NARA identified seven Twitter accounts that we believe contain PRA records but were not captured by the Trump Administration. NARA obtained the publicly available tweets at the end of the administration through a third party to supplement its archival collection. These include accounts from Andrew Giuliani, Chad Gilmartin,

Ivanka Trump, Kayleigh McEnany, Kellyanne Conway, Mark Meadows, and Peter Navarro.

- In its last weeks, the Trump Administration advised NARA that two social media accounts it believed should be treated as containing PRA content were not enrolled in their third party archiving tool and could not be retroactively enrolled. These accounts were Donald J. Trump on Facebook and @realDonaldTrump on Instagram. NARA endeavored to work with Facebook to obtain access to the accounts but was never able to do so.
- SnapChat was used by the Trump Administration (realdonaldtrump and whitehouse), and NARA was advised that they were capturing content posted to the platform. NARA reviewed the transferred social media records and has not located any SnapChat content. SnapChat ultimately banned President Trump from the platform and it is not possible to see any previous content. SnapChat advised NARA that the Trump administration used the White House account approximately five times during four years. However, the realdonaldtrump account was used regularly. News reports indicate the account had 1.5 million followers on the platform. It is not known whether direct messaging was enabled on the account.

Subject: Need for Assistance re Presidential Records

(b) (6), (b) (7)(C):

As the EOP continues to transfer the electronic Trump Presidential records into our custody, we have come upon several problems that we need your help in

resolving. We have already been working with [REDACTED] to address various issues with respect to capturing Presidential records on social media accounts; his assistance has been very helpful, although some problems remain that will likely require further follow up with you.

There are also now certain paper/textual records that we cannot account for. We therefore need your immediate assistance to ensure that NARA receives all Presidential records as required by the Presidential Records Act.

For example, the original correspondence between President Trump and North Korean Leader Kim Jong-un were not transferred to us; it is our understanding that in January 2021, just prior to the end of the Administration, the originals were put in a binder for the President, but were never returned to the Office of Records Management for transfer to NARA. It is essential that these original records be transferred to NARA as soon as possible.

Similarly, the letter that President Obama left for President Trump on his first day in office has not been transferred; since that letter was received by President Trump after his term commenced, it is a Presidential record – note that all of NARA's other Presidential Libraries maintain the original copy of similar letters, and it is necessary that this one be provided to us as well.

It is also our understanding that roughly two dozen boxes of original Presidential records were kept in the Residence of the White House over the course of President Trump's last year in office and have not been transferred to NARA, despite a determination by [REDACTED] in the final days of the Administration that they need to be. I had also raised this concern with [REDACTED] during the final weeks.

We know things were very chaotic, as they always are in the course of a one-term transition. This is why the transfer of the Trump electronic records is still ongoing and won't be complete for several more months. But it is absolutely necessary that we obtain and account for all original Presidential records.

Please let us know as soon as you can how we can get these issues resolved.

Thanks,
Gary

We have some materials from the Trump Administration that need to be moved from Florida to DC. (b) (5)

(b) (6), (b) (7)(C)
(b) (6), (b) (7)(C)
(b) (6), (b) (7)(C)

Pick-up at Mar-a-Lago, delivery to A1. Approx. 12 boxes that are 25" x 12.5" x 10.5".

I mentioned to (b) (6), (b) (7)(C) that I would be reaching out.

Thanks,

Jay

On Tue, Jan 4, 2022 at 11:17 AM William Bosanko <william.bosanko@nara.gov> wrote:

(b) (6), (b) (7),

We have some materials from the Trump Administration that need to be moved from Florida to DC. (b) (5)

[Redacted]

Pick-up at Mar-a-Lago, delivery to A1. Approx. 12 boxes that are 25" x 12.5" x 10.5".

I mentioned to (b) (6), (b) (7)(C) that I would be reaching out.

Thanks,

Jay

(b) (6), (b) (7)(C)

I guess the only logistic requirement is to have the loading dock door open; the driver will unload the shipment with a pallet jack. If needed, I believe you have a copy of the security action plan which has the driver's name and contact information. The last reported location at 10:14 am was Fayetteville NC. The overnight location will be Fredericksburg VA. Any further questions for me please let me know. My cell number is (b) (6), (b) (7)(C).

Subject: Trump boxes

All:

We received 15 bankers boxes and the weather map. My plan was to glance into each box before I shelved it so I could give y'all a high level overview. As I fanned through the pile of newspapers at the top of the first box, I found several unfolded classified docs in between some of the newspapers. So I took all the boxes to the SCIF. The first box I picked up in the SCIF had a newspaper on top that was post 1/20/2021. At that point I decided to take a closer look in each box to see if there are other issues that you three, David, and Deb might want to know about sooner than later. There may be others I didn't notice, but here is an overview.

-The majority of the material consists of newspapers, magazines and printed news articles.

-The majority of the items are not in folders--just piled in the boxes. Some boxes seem to have things from the same time period. Others have documents from multiple years. There is no information written on the boxes to provide any context. And I wasn't joking about the classified docs just showing up in the midst of a stack of newspapers. The lack of any organization was consistent throughout the boxes.

-Thankfully we got more than newspapers and magazines. There are plenty of original Presidential records in there, and many contain Trump handwriting.

-There was one accordion folder in the mess so it stood out. It contained, among other things, the Obama letter and North Korea correspondence. We need to verify that all of the correspondence is there. But I think we are in good shape.

-There are a lot of classified records. The majority of those are head of state briefing papers and briefing cards and most of those are in folders or clipped together. But the folders are scattered throughout the boxes, not filed together. Other classified documents are on a range of topics and more often than not are just loose in the boxes. I saw several docs that I think are PDBs. I also found an incredibly sensitive SAP document.

- Except for a number of presidential daily schedules scattered throughout the boxes, the unclassified docs don't seem to focus on any one issue. I did see some material related to 1/6 and COVID. And at close glance I believe one of the classified docs is responsive to a third Congressional request. So we will need to review all of these boxes.

-As I mentioned, very little of this material is in folders. But about half of one box is filled with a stack of folders, the vast majority of which are the same color and type. Many have a note from the staff secretary clipped to the front that states the topic of the document that is in the folder. Intermixed with these are some folders that have the note attached to the folder, but the folder is empty. And there are quite a few folders with no note and no doc. They look like the other folders and are in the same stack. So it is likely those once had notes and docs. Maybe those items were sent to ORM. There are also about 20ish folders scattered throughout the boxes that contain printouts of photos from random events. There are also numerous chunks of unfolded photos in several boxes. And then there are a handful of empty folders that are identified as coming from the Photo Office and likely contained those photos.

-I think one entire box is post presidential, but there are some items without dates and there could be some pre January 20 docs that I missed. I'll need to go back through it to verify. But without a doubt the vast, vast majority is post presidential. I also ran across small amounts of post presidential material in at least two other boxes. I noticed some of the newspapers were from this fall, so this isn't just a box that was created in February 2021 and was mistakenly stored with the boxes from the residence. So it is clear that some of the boxes were created or altered after the administration.

-There are also a good number of personal/political (non-PRA) docs scattered throughout a few of the boxes. Most relate to the 2020 election.

-Finally, I have the impression that most of this material is from 2020 and 2019. I need to take another look to see if that is actually true, but if it is that might open up questions about when they started creating these boxes of random stuff.

Let me know if there is something of particular interest you want us to explore before we begin to do a detailed inventory.

To: Bosanko, William <william.bosanko@nara.gov>, Susan Donius <susan.donius@nara.gov>, GaryM Stern <garym.stern@nara.gov>

All:

We received 15 bankers boxes and the weather map. My plan was to glance into each box before I shelved it so I could give y'all a high level overview. As I fanned through the pile of newspapers at the top of the first box, I found several unfolded classified docs in between some of the newspapers. So I took all the boxes to the SCIF. The first box I picked up in the SCIF had a newspaper on top that was post 1/20/2021. At that point I decided to take a closer look in each box to see if there are other issues that you three, David, and Deb might want to know about sooner than later. There may be others I didn't notice, but here is an overview.

-The majority of the material consists of newspapers, magazines and printed news articles.

-The majority of the items are not in folders--just piled in the boxes. Some boxes seem to have things from the same time period. Others have documents from multiple years. There is no information written on the boxes to provide any context. And I wasn't joking about the classified docs just showing up in the midst of a stack of newspapers. The lack of any organization was consistent throughout the boxes.

-Thankfully we got more than newspapers and magazines. There are plenty of original Presidential records in there, and many contain Trump handwriting.

-There was one accordion folder in the mess so it stood out. It contained, among other things, the Obama letter and North Korea correspondence. We need to verify that all of the correspondence is there. But I think we are in good shape.

-There are a lot of classified records. The majority of those are head of state briefing papers and briefing cards and most of those are in folders or clipped together. But the folders are scattered throughout the boxes, not filed together. Other classified documents are on a range of topics and more often than not are just loose in the boxes. I saw several docs that I think are PDBs. I also found an incredibly sensitive SAP document.

- Except for a number of presidential daily schedules scattered throughout the boxes, the unclassified docs don't seem to focus on any one issue. I did see some material related to 1/6 and COVID. And at close glance I believe one of the classified docs is responsive to a third Congressional request. So we will need to review all of these boxes.

-As I mentioned, very little of this material is in folders. But about half of one box is filled with a stack of folders, the vast majority of which are the same color and type. Many have a note from the staff secretary clipped to the front that states the topic of the document that is in the folder. Intermixed with these are some folders that have the note attached to the folder, but the folder is empty. And there are quite a few folders with no note and no doc. They look like the other folders and are in the same stack. So it is likely those once had notes and docs. Maybe those items were sent to ORM. There are also about 20ish folders scattered throughout the boxes that contain printouts of photos from random events. There are also numerous chunks of unfolded photos in several boxes. And then there are a handful of empty folders that are identified as coming from the Photo Office and likely contained those photos.

-I think one entire box is post presidential, but there are some items without dates and there could be some pre January 20 docs

that I missed. I'll need to go back through it to verify. But without a doubt the vast, vast majority is post presidential. I also ran across small amounts of post presidential material in at least two other boxes. I noticed some of the newspapers were from this fall, so this isn't just a box that was created in February 2021 and was mistakenly stored with the boxes from the residence. So it is clear that some of the boxes were created or altered after the administration.

-There are also a good number of personal/political (non-PRA) docs scattered throughout a few of the boxes. Most relate to the 2020 election.

-Finally, I have the impression that most of this material is from 2020 and 2019. I need to take another look to see if that is actually true, but if it is that might open up questions about when they started creating these boxes of random stuff.

Let me know if there is something of particular interest you want us to explore before we begin to do a detailed inventory.

- Except for a number of presidential daily schedules scattered throughout the boxes, the unclassified docs don't seem to focus on any one issue. I did see some material related to 1/6 and COVID. And at close glance I believe one of the classified docs is responsive to a third Congressional request. So we will need to review all of these boxes.

-As I mentioned, very little of this material is in folders. But about half of one box is filled with a stack of folders, the vast majority of which are the same color and type. Many have a note from the staff secretary clipped to the front that states the topic of the document that is in the folder. Intermixed with these are some folders that have the note attached to the folder, but the folder is empty. And there are quite a few folders with no note and no doc. They look like the other folders and are in the same stack. So it is likely those once had notes and docs. Maybe those items were sent to ORM. There are also about 20ish folders scattered throughout the boxes that contain printouts of photos from random events. There are also numerous chunks of unfolodered photos in several boxes. And then there are a handful of empty folders that are identified as coming from the Photo Office and likely contained those photos.

-I think one entire box is post presidential, but there are some items without dates and there could be some pre January 20 docs that I missed. I'll need to go back through it to verify. But without a doubt the vast, vast majority is post presidential. I also ran across small amounts of post presidential material in at least two other boxes. I noticed some of the newspapers were from this fall, so this isn't just a box that was created in February 2021 and was mistakenly stored with the boxes from the residence. So it is clear that some of the boxes were created or altered after the administration.

-There are also a good number of personal/political (non-PRA) docs scattered throughout a few of the boxes. Most relate to the 2020 election.

-Finally, I have the impression that most of this material is from 2020 and 2019. I need to take another look to see if that is actually true, but if it is that might open up questions about when they started creating these boxes of random stuff.

Let me know if there is something of particular interest you want us to explore before we begin to do a detailed inventory.

All:

We received 15 bankers boxes and the weather map. My plan was to glance into each box before I shelved it so I could give

y'all a high level overview. As I fanned through the pile of newspapers at the top of the first box, I found several unfolded classified docs in between some of the newspapers. So I took all the boxes to the SCIF. The first box I picked up in the SCIF had a newspaper on top that was post 1/20/2021. At that point I decided to take a closer look in each box to see if there are other issues that you three, David, and Deb might want to know about sooner than later. There may be others I didn't notice, but here is an overview.

-The majority of the material consists of newspapers, magazines and printed news articles.

-The majority of the items are not in folders--just piled in the boxes. Some boxes seem to have things from the same time period. Others have documents from multiple years. There is no information written on the boxes to provide any context. And I wasn't joking about the classified docs just showing up in the midst of a stack of newspapers. The lack of any organization was consistent throughout the boxes.

-Thankfully we got more than newspapers and magazines. There are plenty of original Presidential records in there, and many contain Trump handwriting.

-There was one accordion folder in the mess so it stood out. It contained, among other things, the Obama letter and North Korea correspondence. We need to verify that all of the correspondence is there. But I think we are in good shape.

-There are a lot of classified records. The majority of those are head of state briefing papers and briefing cards and most of those are in folders or clipped together. But the folders are scattered throughout the boxes, not filed together. Other classified documents are on a range of topics and more often than not are just loose in the boxes. I saw several docs that I think are PDBs. I also found an incredibly sensitive SAP document.

- Except for a number of presidential daily schedules scattered throughout the boxes, the unclassified docs don't seem to focus on any one issue. I did see some material related to 1/6 and COVID. And at close glance I believe one of the classified docs is responsive to a third Congressional request. So we will need to review all of these boxes.
