EVALUATOR'S COMMENTS AND FOLLOW-UP QUESTIONS

As a status report, document is of moderate value. Generally negative progress of Yugo attempts to establish a commercial foothold in Mexico not in itself of great interest to this office, at this time, but would increase in interest in direct relation to information on decision of Belgrade to grant a loan to Mexican govt.

COLLECTOR'S COMMENTS AND QUESTIONS

EVALUATOR'S COMMENTS AND FOLLOW-UP QUESTIONS

It is impossible to tell if the USSR prices to Mexico are in line with world prices or not. According to a 1957 Soviet price list, potassium is 3 rubles per millicurie, iodine is 8-to 13 rubles per millicurie and gold is 1 to 3 rubles per millicurie depending upon the form of the carrier. According to the report the average price is $0.15 per millicurie. The quantities of each isotope however, are not given.

Radio isotope prices have changed in the US markedly over the past few years. For example, the price for gold 198 has changed from 20 cents per millicurie prior to May 1959 to 6 cents per millicurie after May 1959. Unless more detailed information is obtained, the information has only moderate value to us.

What specific aspects of this report are of use? Of value? Please indicate and comment.

Information on the type of machinery offered or sold to Mexico or to Latin America is available from overt sources.

Information on prices is interesting and useful. Price quotations would be more helpful if specifications as well as serial numbers were available. Information indicating whether Soviet prices conform to or vary from world market prices.

Information on goods that the Soviets are interested in buying is of some importance, although this is generally available from overt sources.
