MEMORANDUM IN LIEU OF FITNESS REPORT.

SUBJECT : Thomas B. CAFASIN

PERIOD COVERED: January - June 1974

Although I have been the Station case officer for Subject only since January 1974, I have been acquainted with his performance for the Station for the past 5 1/2 years through my assignment in at Heudquarters and, for the past 2 1/2 years, the as the Station officer responsible for operations. have always considered CASASIN to be a highly skilled, experienced senior case officer thoroughly devoted to the work of BKHERALD. He is becoming increasingly effective in his present cover position operating against both Soviet and PRC targets, and I am delighted that he has agreed to continue his cooperation with the Station as a field agent following his retirement from BKHERALD effective 30 June 1974. CASASIN can look back with pride over his years of service with BKHERALD but he can also look forward to additional years of highly useful, productive work for Paris Station.

CASASIN's attitude can best be summed up by a comment on my first operational meeting with him following his official retirement. He instinctively went immediately to a discussion of operations, not of retirement. I am confident that CASASIN will continue to be a highly motivated, effective asset of Paris Station, and I wish him well.

Operations Officer

CONFIDENTIAL

SECTION D

The attached Memorandum in Lieu of a Fitness Report should be read in conjunction with the Status Report on Subject for the period ending 31 March 1974; these reports overlap somewhat in the period covered. As has been indicated by both Russell N. SKOGSBERC, who prepared Section I, and George T. HEMSLEY, who prepared Section III of the Status Report, Subject is an impressive officer who has developed superb cover for himself but who has been only reasonably effective in identifying, developing and turning over useful access agents to the Station. While endorsing the general thrust of the Memorandum in Lieu of a Fitness Report, the undersigned also feels that Subject should bring a sharper focus to bear on developing in-depth relationships with those persons who have the potential of becoming quality access agents to priority targets. Subject meets and knows many people in his milieu, including Sovicts; he reports in considerable volume on these contacts. We encourage him to concentrate on a few of these contacts and to plumb them to their depths. The under-signed joins SKOGSBERG in wishing Subject well and in paying recognition to his motivation and his attitude.

Subject's Specific Duties remained essentially as described in his previous Fitness Report (for the period 1 January - 31 December 1973). I would rate him on these Specific Duties as he was previously rated.

His cover situation is comewhat unique for an NOC in that it puts him in daily contact with his priority target group: Soviet officials and other potential agents having direct access to Soviet officials. This access is not fully exploited. The objective is more first hand reporting by Subject on Soviet officials and assessment reports on several of his co-workers who can be selected and recruited (based on his assessment reports) by other case officers to serve as access agents to Soviet officials.

Despite long service Subject's knowledge of and responsiveness to Organization priorities and requirements has not weakened. He concentrates on priority targets and his operational reporting is complete, on target and highly literate.

As is normal in an position, Subject has no supervisory duties over Organization personnel although his cover job does include supervisory responsibilities. Subject is meticulous in his presentation of financial accountings and his operational expenses are modest. There are no administrative problems related to this project.

SECTION C NARRATIVE (continued)

It has been noted in past fitness reports that subject was weak in long-range, operational development of a target. The ease and probable success of an extended development is a function of the personalities involved. During this reporting period subject has conducted a sustained development of an MHHARSHER despite their different ages and divergent personalities thus demonstrating improvement in this area.

It some times appears that subject's reporting could be more precise and more closely attended to BKTRUST objectives. This is probably the result of time limitations, and the officer's knowledge of BKTRUST needs is lessened by his relative isolation.

As is normal situation, subject has no supervisory duties with BKTRUST personnel. His cover job provided supervisory responsibility. Subject is meticulous in presentation of financial accountings and his operational expenses are modest.

Section 3 - Comments by Reviewing Official

The career of this officer has reached a crucial juncture; if, as we currently anticipate, he succeeds in landing the position for which he appears to have the inside track, he will gain access to an institution and its employees which could prove to be invaluable. His new function will permit the widest possible access to a variety of targets, and with careful guidance, his utility as a spotter and assessor should improve very substantially.

The report notes that this officer has conducted a lengthy dialogue with an MHHARSH target; it is quite accurate that our has handled himself well in a situation where disparity in age and background renders the relationship somewhat incongruous. Nonetheless, accuracy requires that we record that the NOC's interlocutor has obviously not maintained this ongoing relationship solely for altruistic motives, and has, in point of fact, on one occasion suggested that might wish to "help" him in the preparation of restricted distribution reports on the local situation, even though the particular topic was in itself totally innocuous. For these reasons we continue to monitor this relationship with great care, particularly since we simply cannot assess its longer range viability and the direction it is likely to take.

In sum, has done the best he could under somewhat trying circumstances, exacerbated by the severe economic problems of his erstwhile employer, which led to the NOC's being separated from that position at the end of last year. Through his own efforts, learned of the vacancy for which he has applied, and by assiduous and discriminating manipulation of his extensive connections on the local scene, has managed to maneuver himself into becoming the leading candidate for the post. If he is accepted for this position, his value to the Organization will unquestionably increase by a quantum leap, and we are consequently optimistic concerning his future ability to make an impressive contribution to Organizational goals on the local scene.

to the development of human relations. His forte is therefore more in the field of spotting and making operational contacts than in that of more than short-range operational development. Subject's operational situation makes it impossible for him to attempt recruitments. Thus, his very real achievements are not by essence of the spectacular variety.

Subject's reporting has been satisfactory and continue to be copious. He could, however, further improve the selectivity of the leads provided the Station and make more of an effort to "digest" the information contained in his reports.

Although Subject has, at present, no supervisory function, he has repeatedly requested such a responsibility. He is careful with operational expenses and has exercised good security.

During the period under review, additional efforts have been made to make full use of Subject's potential and integrate him further in the work of the station component with which he works. He is a particularly valuable asset for the Station programs directed against the local MHHARSH and TPFAST targets.

Section D (continued)

substantial. In a word, is it worth it? We do not yet know, although our initial impressions are favorable.

On the fitness report itself, this rater would have preferred an "S" rating for specific duty number one; Subject may ultimately deserve an "O", but it does not seem warranted at the present time. Moreover, I believe the overall rating would more properly have been in the higher range of the "P" category, rather than "S", but it is of course a subjective judgment of the rating officer, who is more intimately and directly involved with Subject on a frequent basis.

In sum, the cover is superb, and only time will reveal to what extent the cover requirements permit a full measure on behalf of the Organization. We are following this aspect closely and will be commenting upon it subsequently as we gain experience and knowledge.

from the Organisation, his continued presence at this Station definitely appears to be warranted for a sufficient period to reach more definite conclusions concerning the level of sustained performance over a somewhat longer period than that reflected by this report.

In sum, in spite of the recognised and commendable improvement in this officer's performance during the period under review, the reviewer submits that the letter grade for specific duties 2 and 4 would more properly have been a 'P', and that the overall rating, at this point, would more accurately be set at a level between "P" and "S", probably closer to the former than the latter.

This reviewing comment has been read by the officers who prepared the Fitness Report.

During this reporting period subject had very massally increased the tempo of his activities and contacts. Many agent prospects have been acreened and contacts were established with people of interest to several elements of the Station. Subject is particularly thorough and outstanding on specific investigations where he utilized cover in a skillful and imaginative way. He has improved in terms of people development but in this respect he is still best with people in a professionally related context rather than a contrived social context. As mentioned in the previous report subject's cover assignment does not allow him to make recruitments. Subject has a high degree of cost consciousness and does not exercise any supervisory responsibilities.

Since the last reporting period Subject's efforts were directed by the Station toward the spotting, developing and assessing WOLADY SAT agent candidates in terms of recruitment and inclusion in the Station's

Subject has done thorough and at times imaginative spade work in this field despite the fact that the mission was not as successful as anticipated. Recent progress however would indicate that the next reporting period would be more productive.

Subject continues to respond to ad-hoc specific assignments in an exemplary manner.

Because of the nature of his cover assignment Subject is not authorized to make recruitments.

Subject has a high degree of cost consciousness. He does not exercise any supervisory responsibilities under his cover assignment.

It is difficult to place in the proper perspective the contribution of this senior staff agent to On the one hand, Subject has established superb cover in the scientific and technical field which should have afforded him virtually unlimited access to persons of interest to us, both Soviet and potential access agents. In evaluating the manner in which the employee set up and managed this cover, I would tend to agree with his comments to the fitness report on the meditarials demands on him although these comments are somewhat overdrawn.

The principal difficulty has been the time it has taken to relate the cover potential to the specific operational requirements of the Station. We have not received from CASASIN as . . leads and assessment reports to persons of operational interest in the SET field as we think he could have produced. It may be that the earlier listing of the project (viewed as a regional undertaking) contributed to this.

Recently we have noted significant improvement in that we have received responses to requests we have made for assessment and development of potential access agents within a cover context. We hope, therefore, that this last year of CASASIN's stay will be the most productive ever. It is unfortunate that the cover must end because of the cover company's decisions over which we had no control.

ADDENDLM, Form 45 (Fitness Report), for period March 67-March 68.

Section D

As the individual being rated, I would like to add some remarks to those prepared by the rating officer.

The assignment I have includes managerial responsibilities which (a) are essential to the continued existence and security of the cover mechanism as a vehicle for operational exploitation, and (b) are not necessarily visible to those "on the inside."

In the case of (a), I must engage in a constant orchestration of the cover and the facilities it offers. This means maintaining a managerial equilibrium to insure that cover work will not become, of itself, so demanding that it negates the cover's utility to the CS. In effect, the top officers and middle managers of the cover corporation (who are not cleared and witting) have to be satisfied that their demands are met (or cannot be), or else manipulated in order to neutralize or reject their demands. After all, the cover position is to them a legitimate, normal, workaday post in their firm. What work is done at their bidding, it follows, must be accomplished according to the high standards of thoroughness and accuracy which they have set.

In the case of (b) -- which derives from (a) -- and can prove to be so demanding that the needs of the CS could no longer be served the incumbent is required to manage a span of human contacts at several levels in order to preserve his cover position and enhance its value to the CS. This means planning, directing and managing the work of multinational, multicultural teams of technical correspondents, as well as meetings and negotiations to improve the [cover firm s] relations with similarly widespread individuals at the levels of editor-in-chief, publisher, corporate vice-president, president, and chairman of the board. These levels are scattered not only through industry, but have their analogs as well in government, higher education, and prefessional societies.

Having previously managed both a CS base and the principal deniedareas operating component of a major field Station, I can report quite honestly that my present managerial responsibilities exceed the former -- despite the apparent lack of "supervisory responsibilities" in my present position.

Subject continues to maintain a secure effective cover mechanism. In this reporting period the whole thrust and objectives of this cover facility have been changed from pursuit of targets designated by Bendquarters at international conferences to pursuit of the local Soviet presence. This has caused a major readjustment and Subject is now beginning to produce the type of local that help the Station achieve its local operational objectives.

Subject continues to show a well organized methodical approach to his cover and operational tasks.

During the reporting period this employee as a shaft egent has continued the solidification of his cover and the expansion of his operational activity within his cover to a point where he represents as deeply buried a staff officer as can be found i anyone with his past organizational background. From the point of view of the host country authorities he appears to be completely legitimate. From the more important point of view of his targets, he also apparently has been accepted, and not through a lack of opportunity for scrutiny, for that he claims to be. He thus represents for KUBARK an asset who has not only solid status and access cover, but also the demonstrate capability for exploiting his cover for specific and aggressive operational undertaking As has been stated in past fitness reports, his present capability directly and openly to approach operational targets through the vehicle of his cover is the result of his of efforts, in which he has devoted a transludous amount of work not only to establish and enhance the foundations of the cover, which requires a considerable amount of work for the cover company, but to devise and exploit ways and means by which the cover activity may be applied directly to operational tasks and programs. In addition to operational activity in his country of assignment, he has also been used in Hqs-directed activity in other countries, usually involving direct contact with target individuals, and in addition he has contributed greatly to the acquisition of operational information for the use of Hqs components in their overall approach to Soviet scientific and technical targets. It would be difficult to fault this employee with respect to energy, professional skills, and mental capacity. He is a keen student of his operational environment and very skillful in analyzing the possibilities it offers for application toward operational objectives. He shows considerable resourcefullness in devising logical and credible SECTION D CERTIFICATION AND COMMENTS BY EMPLOYEE I CERTIFY THAT I HAVE SEEN SECTIONS A. B. AND C OF THIS REPORT SIGNATURE OF EMPLOYEE /s/ Thomas B. Casasin 1 June 1965 BY SUPERVISOR IP THIS REPORT HAS NOT BEEN SHOWN TO EMPLOYEE, GIVE EXPLANATION OFFICIAL TITLE OF TUPERVISOR 1 June 1965 Ops Officer BY REVIEWING OFFICIAL

Since the Reviewing Officer in the field has not indicated his views on this Fitness Report, I would like to make a comment of my own. Without vishing to detract from snything the Supervisor has said about Subject's performance, I feel obliged to note that the ratings given him in this report are higher than those given, for example, to any Branch Chief in this Division, and, as such, are inconsistent with the grading pattern of the Division as a whole.

approaches to operational problems and personalities, and expends considerable effort in maintaining a level of specialized knowledge sufficient to backstop his cover and to ensure the maximum explcitation of his contacts with target organizations and individuals. His command of spoken, written, and technical accellent.

From the point of view of supervision, this employee in his present position requires guidance only insofar as to identify specific targets and for him to protect himself in situations where he does not have, by virtue of his not having access to official files, specialized information. Otherwise, he requires no supervision other than the periodic provision of policy and operational directives.

This employee has always been conscious and punctilitous in his preparation of operational and administrative reports, including financial accountings, and his reporting in general, despite the burdens imposed by the necessity for minimizing the risks inherent in the lack of access to classified storage, leaves nothing to be desired.

Other than the funds for operational activities, this employee currently has no responsibility for the programming and use of personnel, space, equipment, and funds.

single-handedly built his present cover/operational position despite a number of negative factors inherent to his situation such as relative isolation, meager opportunity for contact with his professional group, and expensive area of assignment, and an exposed cover situation where the necessity for living cover is compounded by the necessity of avoiding mistakes which might jeopardize cover. His dedication to and enthusiasm for accepting the challenge of this assignment, and his willingness to continue on in it, deserve particular mention, particularly since he would perhaps justifiably feel that his present assignment may leave him cutaide the mainstream of competitive organization progression.

This employee's health and family situations leave nothing to be desired, as his proven mobility in the execution of operational assignments attests.

It should further be noted that with respect to the problem endemic to deep-cover assignments of allocation of time between cover work and operational activity, this employee comes very close to the happy norm of making cover work complement operational work, and making operational work contribute where possible to the enhancement of cover.

While this employee's assignment to date has essentially been a one-man show, it is recommended that serious consideration be given to expanding the operational complex which he has created in order to capitalize on his experience, the work he has put in to date, and his own management capabilities.

*(Section 3) - No special recognition of Subject's "Outstanding" overall performance is being requested at this time.

SECTION C

NARRATIVE COPPENTS

The assignment of this employee to the field was designed to compensate for the loss of an employee in an official cover slot which was out from the Station's ODACID allotment of personnel positions.

During the reporting period this employee has accomplished with success the convincing establishment of his cover in a complex milieu; and has been accepted as legitimate by his professional colleagues, the persons whom he meets under cover, and the French authorities. It should be noted that his ability to assume his cover has been largely the result of his own efforts over a period of years to acquire and maintain a familiarity with the general scientific field.

During the reporting period he has developed a wide circle of contacts in the scientific and journalistic fields and applies a long background in a variety of assignments in KUDOVE to the determination and assessment of operational potential among these contacts. At the same time his cover organization, in which only four persons are witting of his actual status, has shown itself to be more than satisfied with his performance of his cover duties.

This employee requires a minimum of detailed operational supervision; it is necessary in specific cases only to indicate the operational or informational objectives.

From the point of view of administrative support, his attention to detail and meticulousness reduce the problems of his support by the Station to a minimum.

This employee uses the French language continuously, and his facility is such as to permit him to handle himself excellently in a broad range of complex technical subjects. He has in addition undertaken specialized language training to develop this capability further. His operational reporting is excellent both with regard to clarity and pertinence.

In the immediate future he will be assigned case work, for the most part in fields where it will complement, and be complemented by, his independent operational activities and cover work.

SECTION E				

Stress strengths and washings as demonstrated in current pastrion. Indicate suggestions made to employee for improvement of his work. Give recommendations for his training. Describe, if appropriate, his potential for development and for assuming greater responsibilities. Amplify or explain, if appropriate, ratings given in SECTIONS B, C, and D to provide the best basis for determining fewer personnel octions.

In most respects, this officer is one of the best I have known in this agency. He has a broad and deep knowledge of his tarjet area, as well as of his "host" country; an excellent and proven degree of operational "knowledge"; the ability to write and speak includy and effectively and with apparent ease; and a very high degree of notivation and devotion to duty. He can be expected to continue his dynamic and implicative pursuit of a most difficult target. It is my opinion that this officer has great potential and is ready for increased responsibilities which would involve the promotion for which he has been recommended. As for training, a good managerial course adopt help to bring into even sharper focus his many talents.

This report has been prepared in accordance with FE Division standards which recognize the principle of rating the individual against the group. Thus an average rating reflects an entirely satisfactory performance.

110	. Richardson's performance was noticeably outstanding with respect to his thorough know-
	dgo of every activity of the Branch. He was in position to assume direction of Branch

Kr	. Richardson is fully qualified to assume the duties of the chief SE Division represents
ti	we at a field station. In order to assume this responsibility in the most efficient

MEMORANDUM FOR: Thomas B. CAGASIN (SA)

THROUGH

Chief of Station, Paris

SUBJECT

Designation as a Participant in the Organization Retirement and

Disability System

REFERENCE

Book Dispatch 5096 dated 12 August 1965

- 1. Based on a review of your record and the recommendations of the Head of your Career Service and of the Organization Retirement Board, I have determined that you meet the criteria for designation as a participant in the Organization Retirement and Disability System.
- 2. The regulation governing this retirement system provides that "Any participant who has completed fifteen years of service with the Organization and whose career at that time is adjudged by the Director of Personnel to be qualifying for the system may elect to remain a participant in the system for the duration of his employment by the Organization and such election shall not be subject to review or approval by the Director." - 4. It is requested that you indicate your election by checking in the appropriate box and signing below. The original of this memorandum should be returned to Headquarters as soon as possible.

18 students

Student: Jacques Richardson

Year of birth: 1924

FUD Date: September 1956

Grade: 14

Office: 5R

COURSE OBJECTIVES - CONTENT AND METHODS

The Management Course is designed to familiarize scnior line and staff managers with both the theory and the practical problems of management in CIA. The underlying assumption of the course is that management development is a process of growth on the jeb. The course, however, enables the participants to examine their job activities in an environment where, guided by the instructors, they can critically examine their own actions, exchange ideas with managers from other components, and develop an understanding of the complex relationships that exist among the people, the pattern of organization, and the purposes of the Agency. The course approaches the problems of management in the Agency by discussing the formal and informal structures, concepts of leadership and communication, the problems of personnel management, and theories of planning and controlling. These subjects are related as closely as possible to the activities of the class members.

The content of the course is developed through lectures, case and group discussions, filmed presentations, and problem-solving exercises.

Projected Assignment or Present Position

The Counter-spionage Course is a specialized course of three weeks' duration designed to expose the student to CS principles and practices and to indestrinate him therein. The course is conducted on a seminar, round-table basis. Exphasis is placed on student participation during staff and guest lectures. Ample time is allotted for reading the extensive material provided.

Each student is required, starting mid-way in the second week, to give a presentation before the class. This how-leng presentation is based on a problem assignment given the student by the stuff. Exception is made where students have the field or headquarters experience in CE or a related field; such a student is permitted to give a case-hour lecture based on specific experience. The "canned" problems are selected to tost students! ability to de CE research, collate, make logical analyses, and present ideas effectively to a seminar group.

This evaluation is based primarily on the student presentation, and to a lesser degree on participation in seminar discussions when conducted by the staff.

RICHARDSON, Jacques G.

- 1. Mr. Richardson ranked first in a strong group. He applied himself effectively throughout the course. His seminar contributions aided materially. He drew freely on a sound operational background and was by all odds the top student.
- 2. Student Presentation: Mr. Richardson presented a case with which he was familiar from his own experience. It was a first-rate performance. The material was very well organized and crisply prosented. So effective in fact, that Mr. Richardson will be called upon to give the same discussion in subsequent CE courses.
- 3. In my opinion Mr. Richardson is fully qualified to act as senior CE officer.

PERSONNEL EVALUATION:

Fitness Report, 10 April 1958 - 31 March 1959 "Subject continues as one of the most capable, professional and hard working of the branch chiefs in the station. Working against a tough denied area problem, he demonstrates imagination, drive, excellent area background and knowledge, and a high degree of productivity. He definitely has the potential for an even more responsible position." Fitness Report, 1 April 1959 - 24 June 1960 "In most respects, this officer is one of the best I have known in this agency. He has a broad and deep knowledge of his target area, as well as of his 'host country'; an excellent and proven degree of operational 'know-how'; the ability to write and speak lucidly and effectively and with apparent ease; and a very high degree of motivation and devotion to duty." Fitness Report, July 1960 - October 1961 "Subject supervises a very large and key branch engaged in a wide variety of activities, a difficult job which he does well."
